INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks dividend income and long-term capital growth primarily through investments in stocks.

The fund will normally invest at least 65% of its total assets in the common stocks of dividend-paying companies that we expect to increase their dividends over time and also provide long-term appreciation.

- Our in-house research team looks for stocks with sustainable, above-average growth in earnings and dividends, and we attempt to buy them when they are temporarily out of favor or undervalued by the market.

BENEFITS AND RISKS

We believe that a track record of dividend increases is an excellent indicator of financial health and growth prospects. Dividends also help reduce the fund's volatility during periods of market turbulence.

Dividend-paying stocks may lag shares of smaller, faster-growing companies. Also, stocks that appear temporarily out of favor may remain out of favor for a long time.
