Investment Objective & Strategy

The fund seeks dividend income and long-term capital growth primarily through investments in stocks.

The fund will normally invest at least 65% of its total assets in the common stocks of dividend-paying companies that we expect to increase their dividends over time and also provide long-term appreciation.

- Our in-house research team looks for stocks with sustainable, above-average growth in earnings and dividends, and we attempt to buy them when they are temporarily out of favor or undervalued by the market.

Past performance is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 12/30/92) up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Dividend-paying stocks: The fund's emphasis on dividend-paying stocks could cause the fund to underperform similar funds that invest without consideration of a company's track record of paying dividends. **Large- and mid-cap stocks:** Securities issued by large- and mid-cap companies tend to be less volatile than securities issued by small-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. See the prospectus for more detail on the fund's principal risks.
