## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital growth by investing primarily in the common stocks of mid-cap growth companies.

The fund will normally invest primarily in a broadly diversified portfolio of common stocks of mid-cap companies. T. Rowe Price expects the earnings of these companies to grow at a faster rate than the average company.

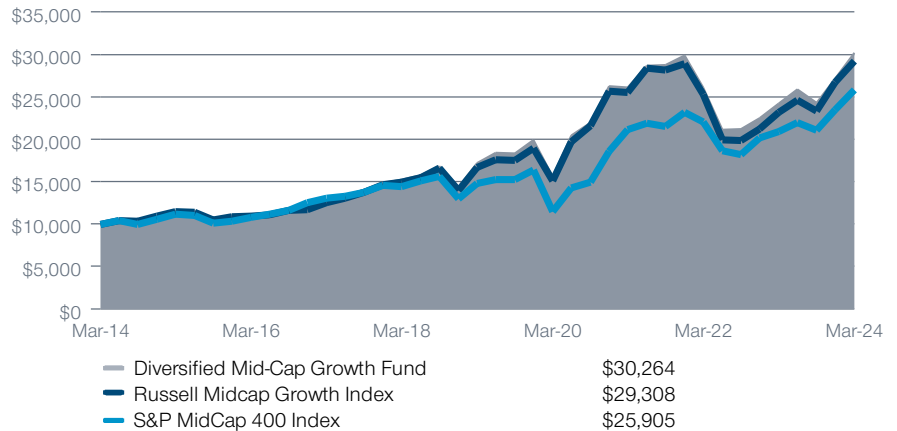

## BENEFITS AND RISKS

The investment community often overlooks mid-cap companies, and their securities may be undervalued, providing the potential for significant capital appreciation.

The stocks of mid-cap companies entail greater risk and are usually more volatile than the shares of large companies.

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
