INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide high current income and, secondarily, capital appreciation.

Invests at least 80% of its net assets in bonds that are issued by companies that are located or listed in, or conduct the predominant part of their business activities in, emerging market countries.

The fund may invest in unrated or below investment-grade bonds.

BENEFITS AND RISKS

Offers potential for high current income and capital appreciation by investing primarily in high-yielding, high-risk bonds in emerging markets in Latin America, Asia, Europe, Africa, and the Middle East.

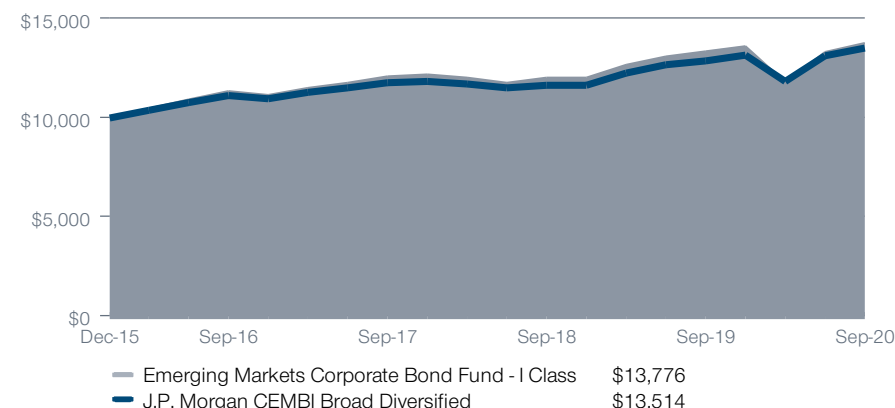

Bonds from emerging markets can offer yields that are higher than those provided by high-quality U.S. and foreign bonds, as well as higher capital appreciation potential.

Involves a high-risk approach to income from foreign bonds, and its share price could fluctuate significantly.

Subject to the risks unique to international investing, including unfavorable changes in currency values, as well as interest rate and credit risks normally associated with investing in bonds.

CUMULATIVE RETURNS

Growth of \$10,000

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

^oExcludes the effect of contractual expense limitation arrangements. If the expense waiver was not in effect for the 30-Day period shown, there may not be a difference in the 30-day SEC yields shown above.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 5 stars among 239 Emerging Markets Bond funds for the 3-year period (as applicable) ending 9/30/2020, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.
