INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in Europe.

Seeks to invest in firms with quality management, strength of franchise, reasonable valuation, and strong cash flows.

Normally, at least five countries will be represented in the portfolio.

– Primary emphasis: Austria, Denmark, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.

Expect to make substantially all of its investments in stocks of companies located in the countries listed above, as well as others as their markets develop.

BENEFITS AND RISKS

Broader investment opportunity—the world's best companies are not only in the United States.

Over long periods, international investing offers diversification benefits relative to an all-U.S. portfolio.

Investing internationally involves special risks, including economic and political uncertainty and currency fluctuation.

Diversification cannot assure a profit or protect against loss in a declining market.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 2, 3, and 3 stars among 86, 84 and 52 Europe Stock funds for the 3-, 5-, and 10-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
