INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks high current income and, secondarily, capital appreciation.

Invest primarily in floating-rate bank loans (also known as leveraged loans) and other floating-rate debt securities with below investment-grade credit ratings.

Broadly diversified across 200-300 issuers, with strict exposure limits to manage risk.

At least 80% of assets are invested in floating-rate bank loans and corporate senior floating-rate notes issued by companies rated below investment grade.

A maximum of 20% of assets can be invested in fixed-rate debt securities, including high-yield bonds.

BENEFITS AND RISKS

The floating-rate feature virtually eliminates interest rate risk.

Bank loans typically rank higher in the capital structure for repayment.

Low historical return correlations with other asset classes, including high-yield bonds, make bank loans a diversifier for equity and fixed-income portfolios.

The loans and debt securities held by the fund are usually considered speculative and involve a greater risk of default and price decline than higher-rated bonds.

This fund could have greater price declines than a fund that invests primarily in high-quality bonds or loans.

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (11/29/16) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 4 stars among 226 Bank Loan funds for the 3-year period (as applicable) ending 9/30/2020, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Sources for credit quality: Moody's Investors Service and Standard & Poor's (S&P); split ratings (e.g., BB/B and B/CCC) are assigned when the Moody's and S&P ratings differ. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency.

T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps. Short-term holdings are not rated. The source of credit quality for the S&P/LSTA Performance Loan Index is Standard & Poor's. All short-term holdings, regardless of ratings, are included with the cash positions.
