Alpha	-0.09%
Standard Deviation	6.15%

⁽¹⁾Portfolio Turnover represents 1 year period ending 12/31/23.

Past performance is not a reliable indicator of future performance.

Morningstar™

Overall Morningstar Rating™ ★★★★★

Morningstar Category™ Bank Loan

Rated against 212 Bank Loan funds, as of 6/30/2024, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Past performance is no guarantee of future results.**

Investment Objective & Strategy

The fund seeks high current income and, secondarily, capital appreciation.

Invest primarily in institutional floating-rate bank loans (also known as leveraged loans) and other floating-rate debt securities with below investment-grade credit ratings. Broadly diversified across 200-300 issuers, with strict exposure limits to manage risk. At least 80% of assets are invested in floating-rate bank loans and corporate senior floating-rate notes issued by companies rated below investment grade. A maximum of 20% of assets can be invested in fixed-rate debt securities, including high-yield bonds.

Calendar Year Returns (%) (NAV, total return)

■ Institutional Floating Rate Fund - F Class (PFFRX)
■ Morningstar LSTA Performing Loan Index (SPLST)

Performance (%) (NAV, total return Performance > 1yr is Annualized)

	3m	YTD	1yr	3yrs	5yrs	10yrs	15yrs	30-Day SEC Yield
PFFRX	2.03	4.35	10.72	5.75	5.08	4.33	5.37	8.41
SPLST	1.94	4.52	11.47	6.33	5.75	4.89	6.11	N/A

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com)

The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The Institutional Floating Rate Fund - F Class shares the portfolio of an existing fund (the original share class of the fund is referred to as the "Institutional Class"). The total return figures for the F class shares show the performance data of the Institutional Class up to the inception date of the F class combined with the performance data of the F Class since its inception. The Institutional Floating Rate Fund - F Class inceptioned on August 27, 2010. The inception date shown for the Institutional class is shown in the table above. The performance results of the Institutional Class have not been adjusted to reflect the administrative fee payments (AFP) associated with the F Class (up to a maximum annual rate of 0.15%). Had the AFP been included, the performance would have been lower.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Interest rates: A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. **Floating rate loans:** Transactions involving floating rate loans may have significantly longer settlement periods than more traditional bond investments (settlement can take longer than 7 days) and often involve borrowers whose financial condition is troubled or highly leveraged, which increases the risk that the fund may not receive its proceeds in a timely manner and that the fund may incur unexpected losses in order to pay redemption proceeds to its shareholders. See the prospectus for more detail on the fund's principal risks.

Morningstar rated the fund 4, 4, and 5 stars among 212, 207 and 167 Bank Loan funds for the 3-, 5-, and 10-year periods (as applicable) ending 6/30/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

Fund Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Fund's accountant. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

"Other" includes any categories not explicitly mentioned.

T. Rowe Price uses a custom structure for sector and industry reporting for this product. Credit ratings for the securities held in the Fund are provided by Moody's and Standard & Poor's and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. Split ratings (e.g., BB/B and B/CCC) are assigned when Moody's and S&P differ. If a rating is not available, the security is classified as Not Rated (NR). The rating of the underlying investment vehicle is used to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.

Unless indicated otherwise the source of all data is T. Rowe Price.
