INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term growth of capital.

The fund will normally invest at least 80% of its net assets in securities issued by companies in the consumer sector. The consumer sector includes consumer staples and consumer discretionary companies (excluding automobiles and components companies). Under normal conditions, the fund will invest at least 40% of its net assets in securities by companies organized or located outside the U.S., including securities of emerging market issuers.

The fund seeks to invest in various companies engaged in the research, development, manufacture, distribution, supply or sale of consumer products, services, or equipment.

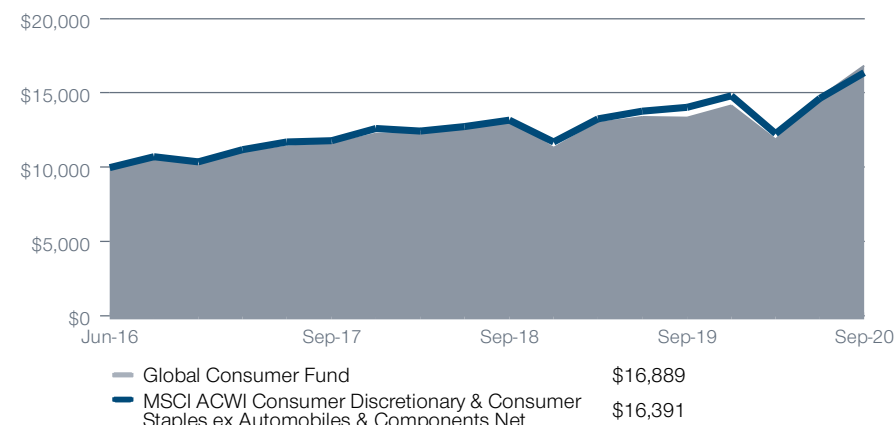

BENEFITS AND RISKS

The fund seeks long-term growth of capital through investments in securities of companies in the U.S. and abroad in the consumer sector.

The fund is less diversified than a non-focused fund and its substantial reward potential is coupled with significant risk. In addition, any foreign holdings could be affected by declining local currencies or adverse political or economic events.
