## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term growth through a combination of capital appreciation and current income.

The fund primarily invests in stocks of real estate companies throughout the world, providing exposure in at least five different countries, including the United States.

## BENEFITS AND RISKS

Changes in tax or zoning laws, overbuilding, environmental issues, changes in interest rates, the quality of property management (REITs), and other factors could hurt the fund.

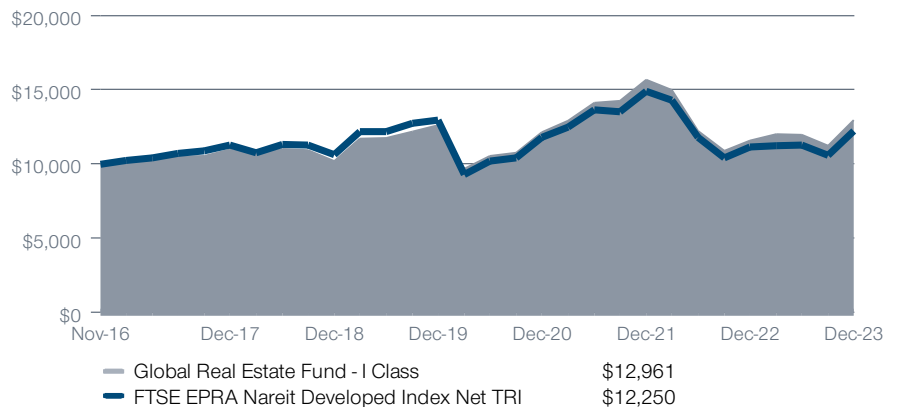

Real estate is affected by general economic conditions. When growth is slowing, demand for property decreases and prices may decline.

Rising interest rates, which drive up mortgage and financing costs, can restrain construction and buying and selling activity and may reduce the appeal of real estate investments.

Since the fund can invest substantially in foreign securities, it will also be subject to the risks inherent in non-U.S. issues.

## CUMULATIVE RETURNS

Growth of \$10,000

**Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com).** The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (11/29/16) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

## MORNINGSTAR™

Overall Morningstar Rating™

Morningstar Category™

Global Real Estate

Rated against 179 Global Real Estate funds, as of 12/31/2023, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics.

**Past performance is no guarantee of future results.**

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 4 and 4 stars among 179 and 179 Global Real Estate funds for the 3- and 5-year periods (as applicable) ending 12/31/2023, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
