Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 10/27/08) up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Growth investing: The fund's growth approach to investing could cause it to underperform other stock funds that employ a different investment style. **Emerging markets:** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.
