Risks: Growth investing: The fund's growth approach to investing could cause it to underperform other stock funds that employ a different investment style. **Large-cap stocks:** Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. See the prospectus for more detail on the fund's principal risks.
