The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (5/3/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund's yield more closely reflects its current earnings than does the total return.

⁽¹⁾In an effort to maintain a zero or positive net yield, T. Rowe Price may voluntarily waive or reimburse all or a portion of the management fee and operating expenses it is entitled to receive from the fund. The 7-day yield without waiver represents what the yield would have been if we were not waiving those fees. In addition, the fund's performance without the fee waiver or reimbursement would also have been lower. This voluntary waiver is in addition to any contractual expense ratio limitation in effect for the fund and may be amended or terminated at any time without prior notice. Please see the prospectus for more details.

You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. T. Rowe Price Associates, Inc. is not required to reimburse the Fund for losses, and you should not expect that T. Rowe Price Associates, Inc. will provide financial support to the Fund at any time, including during periods of market stress.
