## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks high current income and, secondarily, capital appreciation.

Identify issues with above-average yields and the potential for capital appreciation.

Conduct rigorous credit analysis to determine:

- Ability for issuer to pay debt on a timely basis
- Likelihood an issue will be upgraded to investment grade

Typically hold hundreds of individual issues to help reduce the impact of a single issue on fund performance.

## BENEFITS AND RISKS

Significantly greater income potential than Treasury securities or investment-grade bonds in exchange for greater risk.

Effective portfolio diversification.

Three forms of risk may impact high-yield bonds:

- Credit risk (high-yield bonds carry a greater default risk than higher-rated bonds)
- Interest rate risk
- Liquidity risk

## CUMULATIVE RETURNS

Growth of \$10,000

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit ratings for the securities held in the Fund are provided by Moody's and Standard & Poor's and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. Split ratings (e.g., BB/B and B/CCC) are assigned when Moody's and S&P differ. If a rating is not available, the security is classified as Not Rated (NR). The rating of the underlying investment vehicle is used to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.
