INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide current income and capital appreciation.

The fund will normally invest at least 80% of its assets in non-U.S. dollar-denominated bonds. Under normal market conditions the fund will maintain at least 80% of its net assets in U.S. dollar currency exposure.

The fund invests primarily in bonds that are rated investment grade, but may also invest up to 25% of its total assets in bonds that have received a below investment-grade rating from an established credit rating agency, also known as junk bonds.

BENEFITS AND RISKS

High-quality, investment-grade international bonds may offer higher yields than U.S. Treasury securities or investment-grade bonds in exchange for greater risk.

International fixed-income securities offer attractive diversification benefits relative to an all-U.S. bond portfolio.

International investments are generally more volatile than domestic investments.

The fund's attempts at hedging may not be successful and could cause the fund to lose money or fail to get the benefit of a gain on a hedged position. Market conditions that are not favorable for hedging foreign currency exposure back to the U.S. dollar or changes to securities prices, interest rates, currency values and exchange rates may negatively impact the performance of the fund.
