Investment Objective & Strategy

The fund seeks long-term growth of capital through investments in stocks of non-U.S. companies.

Focus on investing in stocks of companies located outside the U.S.

- At least 80% of its net asset in non-U.S. companies.
- No more than 15% of its net assets will be invested in stocks of companies in emerging markets.

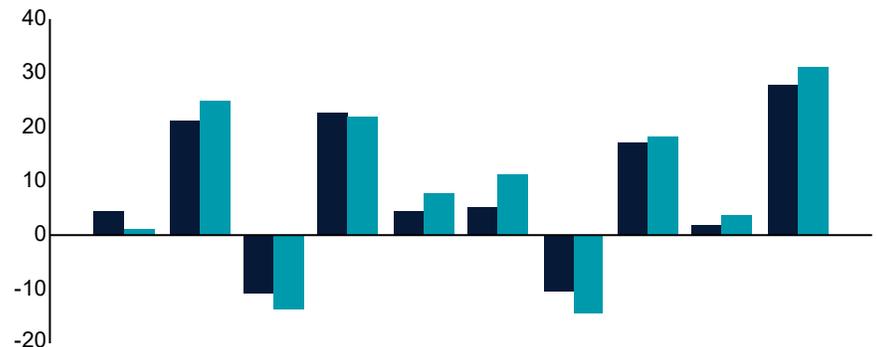

Invests in about 60 to 70 different stocks although the number could vary depending on market condition.

The fund is "nondiversified" meaning it may invest a greater portion of assets in a single company.

Securities are chosen based on "bottom up" research and country allocation is driven by stock selection.
