INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide inflation protection and income by investing primarily in inflation-protected debt securities.

Normally invests at least 80% of its net assets in inflation-protected bonds, with emphasis on bonds issued by the U.S. Treasury (e.g. Treasury inflation-protected securities, or TIPS) but similar bonds issued by U.S. government agencies and corporations may also be purchased.

May invest up to 20% of its net assets in fixed-income securities that are not indexed to inflation or in preferred stocks and convertible securities rated A or better.

BENEFITS AND RISKS

Offers a way to get income potential and protect against inflation by helping preserve the purchasing power of your investment.

Invests in inflation-protected securities; the face value of these bonds and their income will rise with inflation.

Deflationary conditions could cause the fund's principal and income to decrease in value.

Yield and share price will vary with interest rate changes. If interest rates rise significantly from current levels, bond fund total returns will decline and may even turn negative in the short term.

An investment in the fund is not insured or guaranteed by the U.S. government.

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com). The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (12/17/15) and the actual performance results of the I Class since that date.

Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

The Fund's high current yield is due to the rise in the inflation rate, which might not be repeated. Changes in the rate of inflation may cause the Fund's yield to vary substantially from one month to the next.

^oExcludes the effect of contractual expense limitation arrangements. If the expense waiver was not in effect for the 30-Day period shown, there may not be a difference in the 30-day SEC yields shown above.

MORNINGSTAR™

Overall Morningstar Rating™

Morningstar Category™

Inflation-Pro-
tected Bond

Rated against 203 Inflation-Protected Bond funds, as of 3/31/2024, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Past performance is no guarantee of future results.**

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 2 and 2 stars among 203 and 195 Inflation-Protected Bond funds for the 3- and 5-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or “star rating”, is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit ratings for the securities held in the Fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature.

A rating of “AAA” represents the highest-rated securities, and a rating of “D” represents the lowest-rated securities. If the rating agencies differ, the highest rating is applied to the security. If a rating is not available, the security is classified as Not Rated (NR). T. Rowe Price uses the rating of the underlying investment vehicle to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.
