Morningstar™

Overall Morningstar Rating™	★★★
Morningstar Category™	Latin America Stock

Rated against 15 Latin America Stock funds, as of 12/31/2025, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Past performance is not a guarantee or a reliable indicator of future results.**

Investment Objective & Strategy

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in Latin America. Favor companies with attractive valuations and earnings that are growing faster than their local, regional peers. Identify themes/trends and industries that are likely to experience high future growth. Securities are chosen based on bottom-up research, supported by a top-down perspective. Country allocation is driven by stock selection.

Past performance is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class (incepted 12/29/93) up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

⁽³⁾Investors should note that the Fund's short-term performance is highly unusual and unlikely to be sustained.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Investing in Latin America: Many Latin American countries have histories of inflation, government overspending, political and economic instability, social unrest, high interest and unemployment rates, and extreme currency fluctuations. Many of these countries tend to be highly reliant on the exportation of commodities so their economies may be significantly impacted by fluctuations in commodity prices and the global demand for certain commodities. **Emerging markets** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.

Morningstar rated the fund 4 and 3 stars among 15 and 14 Latin America Stock funds for the 3- and 5-year periods (as applicable) ending 12/31/2025, respectively.
