## Morningstar™

Overall Morningstar Rating™	★★★★
Morningstar Category™	Latin America Stock

Rated against 22 Latin America Stock funds, as of 6/30/2024, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Past performance is no guarantee of future results.**

## Investment Objective & Strategy

The fund seeks long-term growth of capital through investments primarily in the common stocks of companies located (or with primary operations) in Latin America. Favor companies with attractive valuations and earnings that are growing faster than their local, regional peers. Identify themes/trends and industries that are likely to experience high future growth. Securities are chosen based on bottom-up research, supported by a top-down perspective. Country allocation is driven by stock selection.

**Risks: Investing in Latin America:** Many Latin American countries have histories of inflation, government overspending, political and economic instability, high interest and unemployment rates, and extreme currency fluctuations. Many of these countries tend to be highly reliant on the exportation of commodities so their economies may be significantly impacted by fluctuations in commodity prices and the global demand for certain commodities.

**Emerging markets:** Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. See the prospectus for more detail on the fund's principal risks.

Morningstar rated the fund 3, 3, and 4 stars among 22, 21 and 15 Latin America Stock funds for the 3-, 5-, and 10-year periods (as applicable) ending 6/30/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

Unless otherwise noted, index returns are shown with gross dividends reinvested.
