INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide, consistent with prudent portfolio management, the highest level of income exempt from federal and Maryland state and local income taxes by investing primarily in investment-grade Maryland municipal bonds.

Invests at least 80% of net assets in Maryland municipal bonds.

While the fund may buy securities of any maturity, the fund generally seeks longer-term securities.

BENEFITS AND RISKS

Offers Maryland investors triple-tax-free income.

Focuses on long-term securities to provide high yields; assets are concentrated in investment-grade bonds to help reduce credit risk.

Yield and share price will vary with interest rate changes.

If interest rates rise significantly from current levels, total returns will decline and may even turn negative in the short term. There is also a chance that some of the fund's holdings may have their credit rating downgraded or may default.

The fund is less diversified than one investing nationally. Some income may be subject to the federal alternative minimum tax.

CUMULATIVE RETURNS

Growth of \$10,000

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully. The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (7/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. Prerefunded securities are rated based on their current prerefunded status, regardless of which nationally recognized statistical rating organization provided the original rating. T.
