INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital appreciation by investing primarily in mid-sized companies that appear to be undervalued.

The fund will invest at least 80% of its net assets in companies whose market capitalization falls within the range of companies in the S&P MidCap 400 Index or the Russell Midcap Value Index.

The fund focuses on companies with the following:

- Attractive operating margins
- Sound balance sheet and financial management
- Stock ownership by management

BENEFITS AND RISKS

Mid-cap companies may be more responsive and better able to adapt to the changing needs of their markets than large companies.

Medium-sized companies tend to have greater resources and, therefore, represent less risk than small companies.

The stocks of mid-cap companies entail greater risk and are usually more volatile than the shares of large companies.

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures
