INVESTMENT OBJECTIVE AND STRATEGY
The fund seeks strong long-term risk adjusted returns.

- The fund uses a highly flexible investment approach in an effort to provide attractive returns, relative to the returns on cash, that bear low correlation to moves in the broader equity and fixed income markets through various market environments, as well as to maintain low overall volatility.
- The fund has broad discretion in seeking investments and utilizes a wide range of strategies and investment disciplines to invest across a variety of asset classes including stocks, bonds, commodities, and currencies.
- The fund expects to maintain long and short positions as well employ leverage through the use of derivatives and total return swaps.

The funds utilizes a broad spectrum of approaches to alternative investments providing multiple alpha sources in an effort to generate return independent of the broader market environment.

| PERFORMANCE |
| (NAV, total return) |

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit troweprice.com. Read it carefully. The Fund’s total return figures reflect the reinvestment of dividends and capital gains, if any. All investments are subject to risk, including the possible loss of the money you invest. For Additional risk information, please see the Risk Disclosure section. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details. For Sourcing Information, please see Additional Disclosures.
Multi-Strategy Total Return Fund

As of March 31, 2023

**Performance Contributions**
Three Months Ended March 31, 2023

Past performance is not a reliable indicator of future performance.

Figures are shown gross of fees. Returns would be lower as a result of the deduction of such fees. Performance returns are in USD. This chart shows the absolute returns of each component strategy that makes up The Multi-Strategy Total Return Fund (MSTR).

**Strategy**
The fund primarily allocates to the following strategies:

- **Macro**: Incorporates a discretionary top-down macro view across equities, rates/sovereign bonds, FX, and credit. Positions are sourced through bottom-up, security level opportunities from the T. Rowe Price Investment Platform.

- **Equity Long/Short**: Hedged equity strategies which are driven by T. Rowe Price Portfolio Manager and Analyst views from across the research platform. Strategies span the global equity universe with both diversified and sector-specific approaches.

- **Fixed Income**: Fixed income strategies trading both rates and credit relative value across global markets. Incorporate Portfolio Manager views and bottom-up analysis with absolute-return or defensive credit mandates.

- **Systematic**: Strategies pursuing alternative risk premia such as carry, value, momentum, or volatility across country level equities, US Treasuries, and FX.

**RISK ALLOCATION**

*Risk allocation is the percentage of expected risk from each strategy, with a sum equal to 100%. Actual results will vary. The risk decomposition is calculated using a multi-asset risk model from MSCI.

**Other**: Temporary, fund-level exposures that do not originate directly from underlying strategies. These tend to be primarily broad market level hedges aimed at anchoring the fund’s overall equity and fixed income risk profile.

**MORNINGSTAR™**
Rated against 128 Multistrategy funds, as of 03/31/2023, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. Past performance is no guarantee of future results.

For Sourcing Information, please see Additional Disclosures.

Not FDIC-Insured. May lose value. No bank guarantee.
Risk Disclosure
There is risk that the fund’s investments will correlate with stocks and bonds to a greater degree than anticipated, and that the risk models used to construct the portfolio may not achieve the desired results. The fund may underperform during up markets and be negatively affected in down markets. Diversification does not assure a profit or eliminate the risk of loss.

International investments can be riskier than U.S. investments due to the effects of currency exchange rates, differences in market structure and liquidity, as well as specific country, regional, and economic developments. These risks are generally greater for emerging markets. Fixed income securities are subject to interest rate, inflation, credit, and default risk. As interest rates rise, bond prices usually fall, and vice versa.

Derivatives may be more volatile than other types of investments because they can be more sensitive to changes in market or economic conditions; risks include currency, leverage, liquidity, index, pricing, and counterparty. Short sales are speculative transactions with potentially unlimited losses; use of leverage can magnify the effect of losses.

Additional Disclosures
Morningstar rated the fund 3 stars among 128 Multistrategy funds for the 3-year period (as applicable) ending 03/31/2023, respectively. The Morningstar Rating™ for funds, or “star rating”, is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
