## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks the highest total return over time consistent with a primary emphasis on income and a secondary emphasis on capital growth.

For income and some appreciation, the fund is actively managed and invests in a diversified portfolio typically consisting of about 40% stocks, 50% bonds, money market securities, and cash reserves; and 10% alternative investments.

The manager can rebalance the investment mix, within defined ranges, based on the economic outlook, interest rates, and financial markets.

## BENEFITS AND RISKS

The common stock portion of the portfolio has the potential to grow faster than inflation over the long term to help protect purchasing power, while the bond portion can help cushion changes in stock prices.

Stock prices can fall because of weakness in the broad market, a particular industry, or specific holdings. The bonds in the fund are subject to interest rate, credit and liquidity risks.

Diversification cannot assure a profit or protect against loss in a declining market.

## CUMULATIVE RETURNS

Growth of \$10,000
