FACT SHEET
Integrated U.S. Small-Cap Growth Equity Fund - I Class
As of March 31, 2023

INVESTMENT OBJECTIVE AND STRATEGY
The fund seeks long-term growth of capital by investing primarily in common stocks of small growth companies.
- The fund will normally invest primarily in small-cap growth companies. The portfolio seeks to be broadly diversified, and the top 25 holdings will not constitute a large portion of assets.
- Our integrated approach to investing combines fundamental analysis and quantitative models to help shape our process for security selection, portfolio construction, and risk management in a systematic manner.
- The portfolio is generally constructed by buying higher ranked stocks and selecting stocks to sell from those that have a lower rank, subject to overall risk controls and desired portfolio characteristics.

BENEFITS AND RISKS
- The fund should offer greater capital appreciation potential than large-company stocks.
- The fund's broad diversification may make it less volatile than small-cap growth funds that have more concentrated portfolios.
- The fund is subject to the risks of stock investing, including possible loss of principal. Small-cap stocks have generally been more volatile in price than the large-cap stocks. The fund's strategy relies heavily on quantitative models to analyze data and construct investment portfolios. Relying on these models entails the risk that the models themselves may be limited or incorrect, that the data the models rely on may be incorrect or incomplete, and that the adviser may not be successful in selecting companies for investment or determining the weighting of particular stocks.
- Diversification cannot assure a profit or protect against loss in a declining market.

FUND INFORMATION
Symbol: TQAIX
CUSIP: 87283A102
Inception Date of Fund: March 23, 2016
Benchmark: MSCI US Small Cap Growth Index
Expense Information (as of the most recent Prospectus): 0.66%
Fiscal Year End: December 31
Total Annual Operating Expenses per $1,000: $6.60
12B-1 Fee: –
Portfolio Holdings Turnover†: 31.1%
Total Assets (all share classes): $7,166,707,268
Percent of Portfolio in Cash: 0.7%
Beta (5 Years): 0.87

†Portfolio Turnover represents 1 year period ending 12/31/22.

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com. Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-855-405-6488 or visit troweprice.com. Read it carefully.

The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (3/23/16) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any. The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Prior to 5 April 2023, the name of the Integrated U.S. Small-Cap Growth Equity Fund was the QM U.S. Small-Cap Growth Equity Fund. For Sourcing Information, please see Additional Disclosures.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 3 and 3 stars among 576 and 534 Small Growth funds for the 3- and 5-year periods (as applicable) ending 3/31/2023, respectively. The Morningstar Rating™ for funds, or “star rating”, is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
