INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term growth of capital.

The fund seeks long-term growth of capital by normally investing at least 80% of its net assets in "real assets" and securities of companies that are engaged in activities related to, or have substantial ownership of, real assets.

Real assets are defined broadly by the fund and are considered to include any assets that have physical properties, such as energy and natural resources, real estate, basic materials, equipment, utilities and infrastructure, and commodities.

BENEFITS AND RISKS

Because the fund focuses its investments in certain industries that involve activities related to real assets, the fund is more susceptible to adverse developments affecting one or more of these industries and may perform poorly during a downturn in any of those industries.

During periods of low inflation, the fund's goal of investing in companies that offer some protection from accelerating inflation could lessen relative returns and cause the fund to underperform other stock funds.

Since there is no limit on the fund's investments in foreign securities or emerging markets, it will be subject to the risk that some holdings will lose value because of unfavorable currency exchange rates or adverse political or economic developments overseas.

CUMULATIVE RETURNS

Growth of \$10,000

INVEST WITH CONFIDENCE®

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Additional Disclosures

Morningstar rated the fund 2 and 2 stars among 394 and 338 World Allocation funds for the 3- and 5-year periods (as applicable) ending 9/30/2020, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
