INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide long-term capital growth by investing primarily in stocks of small companies.

Reliance on T. Rowe Price's intensive in-house small-cap research to help uncover opportunities missed by others.

Invests in a broad range of stocks to help reduce the volatility inherent with small-company investing.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.
