INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to provide income consistent with limited fluctuation in principal value and liquidity.

Utilizes a multi-sector approach by investing in a diversified portfolio of short-term corporate and securitized instruments as well as government securities, leveraged loans, and international and emerging market debt.

The Fund's flexible approach allows it to seek higher income and total return within the short-term bond universe, while remaining nimble to respond to a wide variety of market conditions.

The Fund's broader opportunity set supports its ability to more fully utilize the firm's research and trading platforms to invest in a widely diversified portfolio of bonds, which includes a 10-20% allocation to sub-investment grade securities in most periods.

While the Fund may purchase individual securities with longer maturities, under normal conditions the fund's effective duration will be 3 years or less.

BENEFITS AND RISKS

Yield and share prices will vary with interest rate changes.

The Fund's broad mandate provides investors with access to a diversified portfolio of bonds that pursues higher income while aiming to limit volatility and mitigate downside risk.

Due to the nature of the Fund's investment universe, the Fund will take on incrementally more credit risk than a traditional short-term bond fund.

The Fund is subject to the risks of fixed income investing, including interest rate risk and credit risk. The Fund's investments in sub-investment grade securities are subject to greater volatility and credit risk than those for investment grade bonds.
