Past performance is not a reliable indicator of future performance.

Morningstar™

Overall Morningstar Rating™	★★★
Morningstar Category™	Muni National Interm

Rated against 266 Muni National Interm funds, as of 6/30/2024, based on risk-adjusted total return. Ratings are determined monthly and subject to change. The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. **Past performance is no guarantee of future results.**

Investment Objective & Strategy

The fund seeks the highest level of income exempt from federal income taxes consistent with moderate price fluctuation. Invests primarily in investment-grade tax exempt securities. Weighted average effective maturity will normally range between 3 and 10 years. Typically, at least 90% of the fund's portfolio will consist of investment-grade, tax-exempt securities rated in the four highest credit categories by at least one national rating agency or the equivalent by T. Rowe Price when other ratings are not available. Up to 10% of the fund's total assets may be invested in below- investment-grade bonds.

Calendar Year Returns (%) (NAV, total return)

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com

The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (3/1/19) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Interest rates: A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. **Municipal securities:** Investments in municipal securities may be adversely affected by changes in the financial condition of certain municipal securities issuers and the economy, as well as by events such as unfavorable legislative or political developments that impact the overall municipal securities market or certain sectors of the municipal securities market.

Alternative minimum tax: Although the fund seeks to distribute tax-exempt income, a portion of the fund's otherwise tax-exempt dividends may be taxable to those shareholders subject to the federal alternative minimum tax. See the prospectus for more detail on the fund's principal risks.

Credit Quality

Diversification (%)	Fund	Fund vs LBICP
AAA	16.4	-7.6

Morningstar rated the fund 3 and 3 stars among 266 and 243 Muni National Interim funds for the 3- and 5-year periods (as applicable) ending 6/30/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

Fund Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Fund's accountant. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

"Other" includes any categories not explicitly mentioned.

T. Rowe Price uses a custom structure for sector and industry reporting for this product. Credit ratings for the securities held in the Fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. If the rating agencies differ, the highest rating is applied to the security. If a rating is not available, the security is classified as Not Rated (NR). T. Rowe Price uses the rating of the underlying investment vehicle to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.

Unless indicated otherwise the source of all data is T. Rowe Price.

The Top Guarantors excludes any Prerefunded or Escrowed holdings.
