INVESTMENT OBJECTIVE AND STRATEGY
The fund seeks the highest level of income exempt from federal income taxes consistent with moderate price fluctuation.

• Invests primarily in investment-grade tax exempt securities.
• Weighted average effective maturity will normally range between five and 10 years.
• At least 90% of the fund’s portfolio will consist of investment-grade, tax-exempt securities rated in the four highest credit categories by at least one national rating agency or the equivalent by T. Rowe Price when other ratings are not available.
• Up to 10% of the fund’s total assets may be invested in below-investment-grade bonds.

BENEFITS AND RISKS
• Income level should generally be above that of money market and short-term bond funds but lower than that of long-term bond funds.
• Share price should fluctuate less than that of a long-term bond fund.
• The income dividends you receive from the funds should be exempt from federal income taxes and your state’s own obligations (if any), but may be subject to the federal alternative minimum tax.
• Lower expenses enable the fund to pay higher dividends.
• The fund is subject to the usual risks of fixed-income investing, including interest rate risk, credit risk, and political risk.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 3, 3, and 3 stars among 276, 240 and 170 Muni National Intermediate funds for the 3-, 5-, and 10-year periods (as applicable) ending 3/31/2022, respectively. The Morningstar RatingSM for funds, or “star rating”, is calculated for funds with at least a three-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
