INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks to maximize after-tax growth of capital through investments primarily in common stocks.

Seeks to maximize after-tax growth of capital by investing primarily in the common stocks of mid-size and, to a lesser extent, small companies.

Expects to have significant investments in technology companies.

BENEFITS AND RISKS

Pursues significant return potential of stocks while seeking to reduce the long-term tax burden by investing in a broad range of equities.

Invests in growing firms whose management teams, product lines, and balance sheets—among other measures—bode well for their future prospects.

Multi-cap approach benefits from a well-diversified portfolio of common stocks through a combination of long-term capital growth and tax-smart management.

Holdings are subject to market risk, and share prices may be more volatile than those of a fund focusing on slower-growing or cyclical companies.

CUMULATIVE RETURNS

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com). The T. Rowe Price fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (7/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher. The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The after-tax returns presented reflect the return after taxes on dividends and capital gain distributions and the return after taxes on dividends, capital gain distributions, and gains (or losses) from redemptions of shares held for the time period shown, as applicable. After-tax returns reflect the highest federal income tax rate in effect at the time of each distribution but exclude state and local taxes. During periods when a fund incurs a loss, the post-liquidation after-tax return may exceed the fund's other returns because the loss generates a tax benefit that is factored into the result. An investor's actual after-tax return will likely differ from those shown and depend their individual tax situation. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as a 401(k) account or an IRA. Past after-tax returns do not indicate future performance.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 3 and 3 stars among 1,111 and 1,037 Large Growth funds for the 3- and 5-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.
