## INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks a high level of income consistent with maximum credit protection and moderate fluctuation in principal.

Invests at least 80% of its net assets in U.S. Treasury securities, which are backed by the full faith and credit of the federal government.

The remainder is invested in other securities backed by the full faith and credit of the U.S. government.

Weighted average maturity is expected to range between three and ten years.

## BENEFITS AND RISKS

Offers a way to receive monthly income through investments with the highest credit quality.

May provide higher income than money market and short-term bond funds, but the level of risk associated with intermediate-term bonds is greater.

Primary source of risk is the possibility of rising interest rates, which generally cause bond prices, and a bond fund's share price, to fall.

Longer-term bonds are subject to the greatest price swings because the longer the maturity, the greater the price decline when rates rise and the greater the price increase when rates fall.

## CUMULATIVE RETURNS

Growth of \$10,000

## Definitions

Beta: A measure of market risk of an investment option that shows how responsive the investment is to a given market index, such as the Standard & Poor's 500 Index. By definition, the beta of the benchmark is 1.00. An investment with a beta of 1.10 is expected to perform 10% better than the index in up markets and 10% worse in down markets. Usually, higher betas represent riskier investments. Figures are calculated using monthly data and are net of fees.

Morningstar rated the fund 2, 2, and 3 stars among 221, 211 and 170 Intermediate Government funds for the 3-, 5-, and 10-year periods (as applicable) ending 3/31/2024, respectively. The Morningstar Rating™ for funds, or "star rating", is calculated for funds with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

T. Rowe Price uses a custom structure for diversification reporting on this product.

Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.

Credit ratings for the securities held in the Fund are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature.

A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. If the rating agencies differ, the highest rating is applied to the security. If a rating is not available, the security is classified as Not Rated (NR). T. Rowe Price uses the rating of the underlying investment vehicle to determine the creditworthiness of credit default swaps and sovereign securities. The Fund is not rated by any agency. U.S. Government Agency securities may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.
