## Investment Objective & Strategy

The Trust seeks to provide long-term capital appreciation through investments in common stocks of growth companies.

The Trust focuses on companies having the following characteristics:

- Above-average growth in earnings and cash flow
- Ability to sustain earning momentum even during economic slowdowns
- Occupation of a lucrative niche in the economy and ability to expand even during times of slow economic growth

The Trust will normally invest at least 80% of net assets in the common stocks of large companies.

**Past performance is not a guarantee or a reliable indicator of future results.** Performance figures reflect the deduction of the applicable annual trustee fee, which is used primarily to pay normal operating expenses, including custodial, accounting, and investment management fees. Figures include any changes in principal value and reinvested dividends.

When assessing performance, investors should consider both short-term and long-term returns.

<sup>(3)</sup>Investors should note that the Trust's short-term performance is highly unusual and unlikely to be sustained.

The Trust is subject to policies regarding restrictions on excessive trading, including limits on frequency of purchases and redemptions ("Policy"). Please refer to the Offering Circular for the current Policy.

This class of the Trust inception after the inception date shown above for the Trust generally. Net of fees performance for periods prior to inception of this class (and, if applicable, for periods when this class was subsequently unfunded) was calculated using the historical gross returns of the Trust and then deducting the applicable fee.

**Risks: Growth investing:** The trust's growth approach to investing could cause it to underperform other stock trusts that employ a different investment style. **Large-cap stocks:** Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. See the offering circular for more detail on the trust's principal risks.
