

# Stable Value Common Trust

## Fund (Class K)

As of December 31, 2025

T. Rowe Price

### General Information

Inception Date	September 12, 1988
Benchmark	FTSE 3-Month Treasury Bill
Investment Style	Stable Value
Trustee Fee <sup>(1)</sup>	0.55%
Wrap Fee <sup>(2)</sup>	0.143%
Expense Ratio and Wrap Fees	0.693%

<sup>(1)</sup>Fee includes 0.25% payable to the plan's designated third-party service provider.

<sup>(2)</sup>Wrap Fees are estimated on an annualized basis. They make up fees paid to issuers of the SICs and SACs held by the Trust and custody fees on underlying assets. These fees are paid from underlying assets of the SIC or SAC and reduce the respective contract's crediting rate, thereby reducing interest income earned by the Trust. The Trust's average annual returns shown are net of these fees. Consistent with their accounting as a reduction of income, wrap fees are not included in computing the Trust's annual operating expense ratio as calculated per 29 CFR § 2550.408b-2.

### Investment Objective & Strategy

The Trust seeks to provide maximum current income while maintaining stability of principal.

The Trust will invest primarily in Guaranteed Investment Contracts (GICs), Bank Investment Contracts (BICs), Synthetic Investment Contracts (SICs), and Separate Account Contracts (SACs).

GICs, BICs, SICs, and SACs are types of investment contracts that are designed to provide principal stability and a competitive yield.

**Past performance is not a guarantee or a reliable indicator of future results.** Performance figures reflect the deduction of the applicable annual trustee fee, which is used primarily to pay normal operating expenses of the Trust, including custodial, accounting and investment management fees. Figures include any changes in principal and reinvested dividends. All returns are historical and do not represent future performance.

When assessing performance, investors should consider both short-term and long-term returns.

This class of the Trust inception after the inception date shown above for the Trust generally. Net of fees performance for periods prior to inception of this class (and, if applicable, for periods when this class was subsequently unfunded) was calculated using the historical gross returns of the Trust and then deducting the applicable fee.

**Risks: Stable Value:** Although the T. Rowe Price Stable Value Common Trust Fund seeks to preserve the value of your investment at \$1.00 per unit, it cannot guarantee to do so. It is possible to lose money by investing in the trust. **Liquidity:** Because the trust's investments are not actively traded in the open market and generally must be held until maturity, there is a risk that, like any investment, one or more of the trust's holdings could fail to make scheduled interest and principal payments prior to maturity, potentially reducing the trust's income level and causing a loss of principal. See the offering circular for more detail on the trust's principal risks.

The T. Rowe Price Stable Value Common Trust Fund (the "Trust") is not a mutual fund, rather the Trust is operated and maintained so as to qualify for exemption from registration as a mutual fund pursuant to Section 3(c)(11) of the Investment Company Act of 1940, as amended. The Trust is established by T. Rowe Price Trust Company under Maryland banking law, and its units are exempt from registration under the Securities Act of 1933. Investments in the Trust are not deposits or obligations of, or guaranteed by, the U.S. government or its agencies or T. Rowe Price Trust Company and are subject to investment risks, including possible loss of principal. Trust Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Trust's accountant. The Morningstar US CIT Stable Value Universe is an equal-weighted total return average across all participating funds in the universe and represents approximately 75% of the stable value pooled funds available to the marketplace.

T. Rowe Price uses a custom structure for diversification reporting on this product. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Credit ratings for the securities held in the Trust are provided by Moody's, Standard & Poor's and Fitch and are converted to the Standard & Poor's nomenclature. A rating of "AAA" represents the highest-rated securities, and a rating of "D" represents the lowest-rated securities. If the rating agencies differ, the highest rating is applied to the security. If a rating is not available, the security is classified as Not Rated (NR). T. Rowe Price uses the rating of the underlying investment vehicle to determine the creditworthiness of credit default swaps and sovereign securities. The Trust is not rated by any agency. U.S. Government Agency securities, if any, may include conventional pass-through securities and collateralized mortgage obligations. This category may include rated and unrated securities.

Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

The Trust imposes a 90-day "equity wash" provision on exchanges to competing funds. The Trust is interest rate sensitive; therefore, direct exchanges from the Trust to money market funds and certain short-term bond funds are not permitted. "Permissible" or "eligible" investment options include most common stock funds and any fixed-income fund with a duration that is equal to or greater than three years. Exchanges from the Trust must remain invested in eligible investment options for at least 90 days before exchanging into a competing fund.

Portfolio holdings are historical and subject to change. This material should not be deemed a recommendation to buy or sell any securities mentioned.
