Investment Objective & Strategy

The Trust seeks long-term growth of capital and, secondarily, increasing dividend income by investing primarily in common stocks of well-established growth companies. The Trust focuses on companies having one or more of the following characteristics:

- Superior growth in earnings and cash flow
- Ability to sustain earnings momentum even during economic slowdowns
- Occupation of a lucrative niche in the economy and ability to expand even during times of slow economic growth

Performance figures reflect the deduction of the applicable annual trustee fee, which is used primarily to pay normal operating expenses, including custodial, accounting, and investment management fees. Figures include any changes in principal value and reinvested dividends.

⁽³⁾Investors should note that the Trust's short-term performance is highly unusual and unlikely to be sustained.

When assessing performance, investors should consider both short-term and long-term returns. **Past performance is not a reliable indicator of future performance.**

The Trust is subject to policies regarding restrictions on excessive trading, including limits on frequency of purchases and redemptions ("Policy"). Please refer to the Offering Circular for the current Policy.

Risks: Growth investing: Growth stocks tend to be more volatile than certain other types of stocks and their prices may fluctuate more dramatically than the overall stock market. **Large-cap stocks:** Securities issued by large-cap companies tend to be less volatile than securities issued by small- and mid-cap companies. However, large-cap companies may not be able to attain the high growth rates of successful small- and mid-cap companies, especially during strong economic periods, and may be unable to respond as quickly to competitive challenges. See the offering circular for more detail on the trust's principal risks.
