The principal value of the Trusts is not guaranteed at any time, including at or after the target date, which is the approximate year an investor plans to retire (assumed to be age 65) and likely stop making new investments in the product. If an investor plans to retire significantly earlier or later than age 65, the Trusts may not be an appropriate investment even if the investor is retiring on or near the target date. The Trusts invest in a broad range of underlying portfolios that include stocks, bonds, derivatives, and short-term investments and are subject to the risks of different areas of the market. The Trusts emphasize potential capital appreciation during the early phases of retirement asset accumulation, balance the need for appreciation with the need for income as retirement approaches, and focus on supporting an income stream over a long-term postretirement withdrawal horizon. The Trusts maintain a substantial allocation to equities both prior to and after the target date, which can result in greater volatility. Derivatives may be riskier or more volatile than other types of investments because they are generally more sensitive to changes in market or economic conditions. The Trusts are not designed for a lump-sum redemption at the target date and do not guarantee a particular level of income. Diversification cannot assure a profit or protect against loss in a declining market.

The T. Rowe Price Retirement 2055 Trust (the "Trust") is not a mutual fund, rather the Trust is operated and maintained so as to qualify for exemption from registration as a mutual fund pursuant to Section 3(c)(11) of the Investment Company Act of 1940, as amended. The Trust is established by T. Rowe Price Trust Company under Maryland banking law, and its units are exempt from registration under the Securities Act of 1933. Investments in the Trust are not deposits or obligations of, or guaranteed by, the U.S. government or its agencies or T. Rowe Price Trust Company and are subject to investment risks, including possible loss of principal.

For any equity benchmarks shown, returns are shown with gross dividends reinvested, unless otherwise noted.

Trust Assets, holdings-based analytics (excluding portfolio turnover), and portfolio attribution are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Trust's accountant. Diversification exhibits may not add to 100% due to exclusion or inclusion of cash. Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

T. Rowe Price uses a custom structure for diversification reporting on this product. Unless indicated otherwise the source of all data is T. Rowe Price.
