### Investment Objective & Strategy

The fund seeks long-term capital appreciation.

The Portfolio will invest at least 80% of net assets in common stocks of health sciences companies.

Management divides the health sciences sector into four main areas: pharmaceuticals, health care companies, product and device providers, and biotechnology firms.

The allocation among these four areas will vary depending on the relative potential the manager sees within each area and the outlook for the overall health sciences sector.

The Portfolio average annual total return figures reflect the reinvestment of dividends and capital gains, if any. **Figures do not reflect fees at the insurance product level; if these fees were included, returns would be lower**

**Risks: Health sciences companies:** A fund that focuses its investments in specific industries or sectors is more susceptible to adverse developments affecting those industries and sectors than a more broadly diversified fund. **Foreign investing:** Investments in the securities of non-U.S. issuers may be adversely affected by local or regional, political, social, and economic conditions; greater volatility; reduced liquidity; or decreases in foreign currency values relative to the U.S. dollar. See the prospectus for more detail on the fund's principal risks.
