

Small-Cap Stock Fund (OTCFX)

As of December 31, 2025

T. Rowe Price

Portfolio Highlights

The portfolio underperformed the Russell 2000 Index for the three-month period ended December 31, 2025.

Relative performance drivers:

- + Information technology (stock selection)
- + Industrials and business services (stock selection)
- Health care (stock selection)
- Communication services (stock selection)

Additional details:

- It was yet another volatile quarter for small caps, albeit final returns were much more muted compared to previous quarters as factor performance finally broadened out and the low-quality leadership that led for most of the year started to show signs of reversing.
- We maintain conviction in our investment process, remain focused on identifying the advantaged companies across our universe that offer relative value, and believe that our fundamental and patient approach will provide strong long-term results.

Fund Information

CUSIP	779572106
Inception Date of Fund	June 01, 1956
Benchmark	Russell 2000 Index
Expense Information (as of the most recent Prospectus)	0.90%
Total Assets (all share classes)	\$8,160,377,231
Percent of Portfolio in Cash	0.7%

Performance (%) (NAV, total return performance > 1 year is annualized)

	3m	1yr	3yrs	5yrs	10yrs	15yrs
Small-Cap Stock Fund	1.36	8.30	12.39	4.94	10.89	10.90
Russell 2000 Index	2.19	12.81	13.73	6.09	9.62	9.47

Calendar Year Performance (%) (NAV, total return)

Past performance is not a guarantee or a reliable indicator of future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com.

The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Small-cap stocks: Investments in securities issued by small-cap companies are likely to be more volatile than investments in securities issued by larger companies. **Foreign investing:** Non-U.S. securities tend to be more volatile and have lower overall liquidity and trading volume than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. See the prospectus for more detail on the fund's principal risks.

Performance Review

U.S. Equities Overcame Valuation, Spending Headwinds to End Year Higher

U.S. stocks finished the fourth quarter higher, with interest rate cuts helping overcome investor concerns about valuations and capital expenditure for companies within the AI trade. Even as the government was shut down in October and sharp tariff rhetoric toward China caused macroeconomic uncertainty, equities advanced in the month thanks to largely strong corporate earnings and a series of agreements between companies meant to accelerate AI development. In November, hawkish commentary from the U.S. Federal Reserve surrounding further rate cuts and scrutiny over valuations and spending in the AI space created headwinds early in the month, but softer economic readings as the month progressed sparked hopes for a December interest rate cut and helped stocks finish higher. In December, the Federal Reserve cut interest rates by 25 basis points, but equities were mixed as further AI scrutiny and unfavorable macroeconomic data led to more muted returns as the year ended.

Relative Contributors

Information technology (stock selection)

- **MACOM Technology Solutions:** MACOM Technology Solutions is a unique analog and mixed signal semiconductor business that targets niche communications and radio frequency end markets. Shares advanced following a solid earnings beat as quarterly revenues surpassed consensus estimates. Investors were also pleased with MACOM's fiscal year guidance raise as the company expects to see growth in its AI data center, aerospace and defense, and satellite communications segments. We continue to have high conviction in MACOM and particularly value their industrial and defense business given the high barriers to enter the segment, as well as the less cyclical nature of aerospace and defense.
- **IonQ:** Shares of IonQ sold off notably during the quarter. Our meaningful underweight to the name aided relative performance.

Industrials and business services (stock selection)

- **RBC Bearings:** RBC Bearings is a niche supplier of ball bearings, roller bearings, plain bearings, and engineered products to the aerospace and defense and industrial end markets. Shares spiked on quarterly results that surpassed analyst expectations thanks in part to robust demand from aerospace and defense markets. RBC also reported substantial backlog growth which provides strong visibility into future revenue streams. We like the company's strong management team and believe it is positioned for above-average organic growth as end markets recover.
- **Api:** Api Group specializes in fire protection installation and inspection. Shares advanced steadily during the quarter, driven by a strong earnings beat and durable growth in inspection, service, and project revenues. Later in the quarter, shares climbed further after Api announced its acquisition of CertaSite, a Midwest fire/life safety provider. Following the deal, Api raised full-year revenue guidance, as CertaSite is expected to significantly boost revenues and expand Api's footprint. We believe this is an accelerating growth story with multiple levers to pull, including reducing leverage and consolidating unprofitable branches. Additionally, the reshoring of manufacturing facilities to North America should increase API Group's total addressable market.

Relative Detractors

Health care (stock selection)

- **Masimo:** Masimo is a manufacturer of non-invasive medical monitoring technologies, such as pulse oximetry devices. The company released solid earnings results in November, but shares pulled back after management narrowed revenue guidance as tariffs are expected to weigh on Masimo's gross margins more than initially expected. Ongoing tariff concerns and questions regarding Masimo's growth outside of its core pulse oximetry technology are headwinds that may pressure shares in the short-term.
- **Arcellx:** Arcellx is a clinical stage biotechnology company focused on autologous CAR-T therapy. Shares sold off strongly in November after a competitor released promising early-stage data for its multiple myeloma CAR-T therapy. We believe the selloff was overdone given the early nature of the competitor's data. We still believe Arcellx's treatment for multiple myeloma has the potential to be a best-in-class therapy that could generate durable revenues over time.

Communication services (stock selection)

- **Liberty Live Holdings:** Liberty Live Holdings reflects the economic contribution of Live Nation, including Live Nation Concerts and Ticketmaster. Shares declined after Live Nation reported a surprise earnings and revenue miss, despite strong event attendance from fans. Shares may have also been pressured by broader economic headwinds, such as inflation and a slowing job market, that could dampen consumer spending on live events. We still believe Live Nation is a best-in-class asset and Liberty Live Holdings provides small-cap managers exposure to Live Nation at a substantial discount to net asset value.
- **Echostar Corporation:** Shares of Echostar Corporation generated robust returns during the fourth quarter of 2025. Not owning the company hurt relative returns.

Portfolio Positioning And Activity

Sector weightings are a result of our bottom-up stock selection process. Market volatility created opportunities to increase our highest-conviction ideas while moving on from stocks that we felt may not be favorably positioned given changing market dynamics. We continued to seek out companies that are solving hard problems, believing that they will be successful regardless of the macro environment.

Significant Purchases

- **Dyne Therapeutics:** Dyne Therapeutics is a clinical stage biotech company focused on developing treatments for serious neuromuscular diseases. Dyne has pioneered a muscle-delivery oligonucleotide platform that we believe could transform drug development for a wide range of muscular genetic disorders.
- **Cenovus Energy:** Cenovus is an integrated oil company headquartered in Calgary, Alberta that offers leverage to oil prices given its position in the oil sands with conventional heavy oil production in Alberta. We received shares of the company after it completed its acquisition of MEG Energy during the quarter.
- **CareTrust REIT:** We purchased shares of CareTrust REIT, which owns, acquires, and leases health care-related properties. The company has a solid balance sheet, is growing very fast, and is led by a strong management team. We also found the current valuation reasonable.
- **Immunome:** We upped our stake in Immunome, an early-stage biotech company developing targeted oncology drugs. The company's lead asset, varegacestat, has shown best-in-class data in desmoid tumors with launch expected in 2027.

Significant Sales

- **Descartes Systems:** We sold shares of Descartes Systems, a provider of niche supply chain technology and transportation management software, in order to fund higher-conviction ideas.
- **Cadence Bank:** We sold shares of Cadence Bank after the company agreed to be acquired by Huntington Bank.

- **Mirion Technologies:** We trimmed our position in Mirion Technologies on strength as shares appreciated to all-time highs during the quarter. We maintain high conviction in the name and believe Mirion is an undervalued high-quality asset with margin upside.
- **Metsera:** We sold shares of Metsera after it agreed to be acquired by Pfizer.

Manager's Outlook

It was yet another volatile quarter for small caps, albeit final returns were much more muted compared to previous quarters as factor performance finally broadened out and the low-quality leadership that led for most of the year started to show signs of reversing. Although we cannot predict the direction of the market in 2026, the possibility remains that the attractive growth set up for small caps will coincide with continued volatility. Despite these uncertainties, history has shown us that low-quality market environments are historically short-lived and followed by more durable market environments that benefit our active management approach. We maintain conviction in our investment process, remain focused on identifying the advantaged companies across our universe that offer relative value, and believe that our fundamental and patient approach will provide strong long-term results.
