STRATEGY HIGHLIGHTS

As of 30 September 2020

Global Multi-Sector Bond Strategy

Total Global Multi-Sector Bond Strategy Assets:[1] $1.9 billion[2]
Figures shown in U.S. Dollars

INVESTMENT APPROACH

- Designed to generate alpha through effective combination of top-down sector allocation, currency positioning, and interest rate management with high-conviction, bottom-up security selection from our specialized global research platform.
- Flexible investment mandate seeks to increase the potential for excess return in a diversified, multi-sector portfolio by tactically allocating across a global opportunity set of 15 sectors, including below-investment grade and non-U.S. dollar-denominated securities.
- Actively diversify risk across both quantitative risk factors and qualitative investment themes
- Our Global Multi-Sector Bond Strategy offers flexibility to incorporate a wide range of strategy designs and customized benchmarks, including both total return and flexible duration mandates.

PORTFOLIO CONSTRUCTION

- Base strategy target tracking error range: 200-500 basis points
- Up to 50% of assets may be unhedged to exploit currency valuation opportunities Profile can be tailored to specific client risk tolerances
- Benchmark Details:
  - Base strategy: Bloomberg Barclays Global Aggregate USD Hedged Index
  - Ability to create custom benchmarks in a variety of base currencies and flexible duration mandates

BENCHMARK

- Linked Performance Benchmark*

PERFORMANCE

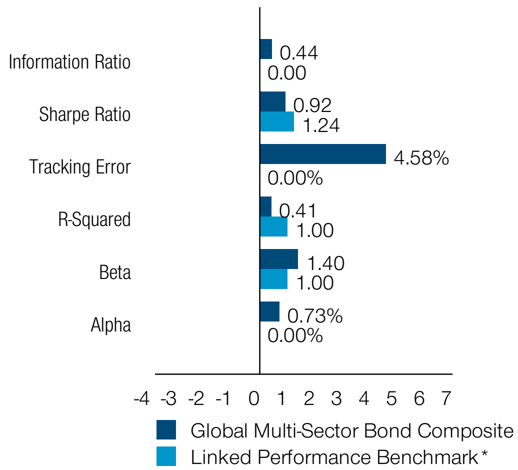
	Three Months	Year-to-Date	One Year	Annualized Three Years	Annualized Five Years	Annualized Ten Years
Global Multi-Sector Bond Composite (Gross)	3.66%	4.46%	5.95%	5.69%	6.47%	5.31%
Global Multi-Sector Bond Composite (Net)	3.56	4.17	5.56	5.30	6.07	4.92
Linked Performance Benchmark*	0.73	4.65	4.14	5.13	4.47	4.05
Value Added (Gross)	2.93	-0.19	1.81	0.56	2.00	1.26
Value Added (Net)	2.83	-0.48	1.42	0.17	1.60	0.87

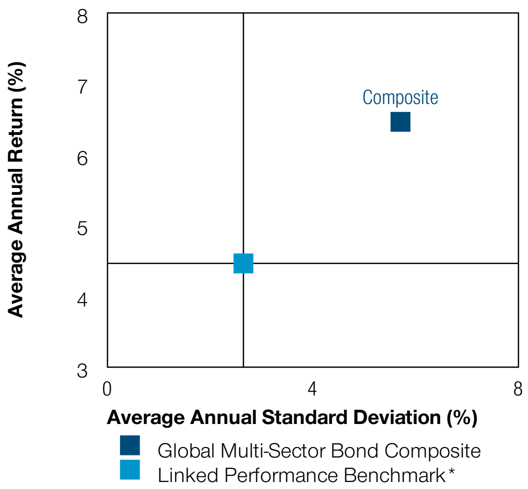
Past performance is not a reliable indicator of future performance.
Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the highest applicable management fee that would be charged based on the fee schedule contained within this material, without the benefit of breakpoints. Gross and net performance returns reflect the reinvestment of dividends and are net of all non-reclaimable withholding taxes on dividends, interest income, and capital gains.

*Effective October 1, 2018, the benchmark for the Composite changed to the Bloomberg Barclays Global Aggregate Bond USD Hedged Index. Prior to this change, the benchmark was the Bloomberg Barclays Multiverse Index USD Hedged. Prior to February 1, 2017, the benchmark was the Barclays Global Aggregate ex Treasury Bond USD Hedged Index. The changes were made because the firm viewed the new benchmark to be a better representation of the investment strategy of the Composite. Historical benchmark representations have not been restated. For Sourcing Information, please see Additional Disclosures.

RISK/RETURN CHARACTERISTICS

Five Years ended 30 September 2020





Past performance is not a reliable indicator of future performance. Statistics based on monthly gross returns. Returns would have been lower as the result of the deduction of applicable fees.

For Sourcing Information, please see Additional Disclosures.

Figures shown in U.S. Dollars

FEE SCHEDULE

Global Multi-Sector Bond Composite

The Global Multi-Sector Bond Composite seeks high income and some capital appreciation primarily through investment in sectors and securities within the Bloomberg Barclays Global Aggregate Bond USD Hedged Index. The strategy may also invest in bank loans, non-agency MBS, and convertible bonds. (Created December 2008)

First $50 million	37.5 basis points
Next $50 million	32.5 basis points
Above $100 million	27.5 basis points on all assets *
Above $250 million	22.5 basis points on all assets *
Minimum separate account size	$100 million.

* A transitional credit is applied to the fee schedule as assets approach or fall below the break point.

For Sourcing Information, please see Additional Disclosures.

[1]Reflects deduction of highest applicable fee schedule without benefit of breakpoints. Investment return and principal value will vary. Past performance is not a reliable indicator of future performance. Monthly composite performance is available upon request. **See below for further information related to net of fee calculations**.

[2]Effective October 1, 2018, the benchmark for the composite changed to the Bloomberg Barclays Global Aggregate Bond USD Hedged Index. From February 1, 2017 to September 30, 2018, the benchmark was the Bloomberg Barclays Multiverse USD Hedged Index. Prior to February 1, 2017, the benchmark was the Barclays Global Aggregate ex Treasury Bond USD Hedged Index. The changes were made because the firm viewed the new benchmark to be a better representation of the investment strategy of the composite. Historical benchmark representations have not been restated.

[3]Preliminary - subject to adjustment.

T. Rowe Price (TRP) has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®). TRP has been independently verified for the 23-year period ended June 30, 2019 by KPMG LLP. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

TRP is a U.S. investment management firm with various investment advisers registered with the U.S. Securities and Exchange Commission, the U.K. Financial Conduct Authority, and other regulatory bodies in various countries and holds itself out as such to potential clients for GIPS purposes. TRP further defines itself under GIPS as a discretionary investment manager providing services primarily to institutional clients with regard to various mandates, which include U.S., international, and global strategies but excluding the services of the Private Asset Management group. The minimum asset level for equity portfolios to be included in composites is $5 million and prior to January 2002 the minimum was $1 million. The minimum asset level for fixed income and asset allocation portfolios to be included in composites is $10 million; prior to October 2004 the minimum was $5 million; and prior to January 2002 the minimum was $1 million. Valuations are computed and performance reported in U.S. dollars.

Gross performance returns are presented before management and all other fees, where applicable, but after trading expenses. Net of fees performance reflects the deduction of the highest applicable management fee that would be charged based on the fee schedule contained within this material, without the benefit of breakpoints. Gross and net performance returns reflect the reinvestment of dividends and are net of nonreclaimable withholding taxes on dividends, interest income, and capital gains. Effective June 30, 2013, portfolio valuation and assets under management are calculated based on the closing price of the security in its respective market. Previously portfolios holding international securities may have been adjusted for after-market events. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. Dispersion is measured by the standard deviation across asset-weighted portfolio returns represented within a composite for the full year. Dispersion is not calculated for the composites in which there are five or fewer portfolios.

The strategy utilizes on a regular basis a variety of derivative instruments such as (but not limited to) currency forwards, fixed income futures, interest rate swaps, credit default swaps, synthetic indices, and options on all mentioned instruments, primarily to hedge certain market risks associated with the strategy's objective, to express directional opportunities on specific markets and to facilitate liquidity management.

Benchmarks are taken from published sources and may have different calculation methodologies, pricing times, and foreign exchange sources from the composite.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow greater than or equal to 15% of portfolio assets. The temporary removal of such an account occurs at the beginning of the measurement period in which the significant cash flow occurs and the account re-enters the composite on the last day of the current month after the cash flow. Additional information regarding the treatment of significant cash flows is available upon request.

The firm's list of composite descriptions and/or a presentation that adheres to the GIPS® standards are available upon request.

A portfolio management change occurred effective January 31, 2018. There were no changes to the investment program or strategy related to this composite.

ADDITIONAL DISCLOSURES

Portfolio Construction: There is no guarantee that the investment will remain within the anticipated ranges of exposure.

Weighted Average Maturity is an average of the maturities of the underlying bonds, with each bond's maturity weighted by the percentage of Composite assets it represents. Weighted Average Effective Duration is a calculation that seeks to measure the price sensitivity of the Composite to changes in interest rates. In general, the longer the average maturity or duration, the greater the Composite's sensitivity to interest rates. Duration is a better indicator of price sensitivity because it takes into account the time value of cash flows.

Unless indicated otherwise the source of all data is T. Rowe Price.
The specific securities identified and described do not represent all of the securities purchased or sold for this Composite. This information is not intended to be a recommendation to take any particular investment action and is subject to change. No assumption should be made that the securities identified and discussed were or will be profitable.
The Top Issuers excludes U.S. Treasuries, institutional funds, agencies and securitized products.
Source for Sector Diversification: T. Rowe Price
Diversification exhibits may not add to 100% due to exclusion or inclusion of cash.
Sources for credit quality: Moody's Investors Service; if Moody's does not rate a security, then Standard & Poor's (S&P) is used as a secondary source. When available, T. Rowe Price will use Fitch for securities that are not rated by Moody's or S&P. T. Rowe Price does not evaluate these ratings, but simply assigns them to the appropriate credit quality category as determined by the rating agency. T. Rowe Price uses the rating of the underlying investment vehicle for credit default swaps.

The representative portfolio is an account in the composite we believe most closely reflects current portfolio management style for the strategy. Performance is not a consideration in the selection of the representative portfolio. The characteristics of the representative portfolio shown may differ from those of other accounts in the strategy. Please see the GIPS Disclosure page for additional information on the composite.
Certain numbers in this report may not equal stated totals due to rounding. Unless otherwise stated, data is as of the report date.

Risks

The following risks are materially relevant to the portfolio.

ABS/MBS risk - These securities may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk.

Contingent convertible bond risk - Contingent convertible bonds have similar characteristics to convertible bonds with the main exception that their conversion is subject to predetermined conditions referred to as trigger events usually set to capital ratio and which vary from one issue to the other.

Credit risk - A bond or money market security could lose value if the issuer's financial health deteriorates.

Currency risk - Changes in currency exchange rates could reduce investment gains or increase investment losses.

Default risk - The issuers of certain bonds could become unable to make payments on their bonds.

Derivatives risk - Derivatives may result in losses that are significantly greater than the cost of the derivative.

Emerging markets risk - Emerging markets are less established than developed markets and therefore involve higher risks.

High yield bond risk - A bond or debt security rated below BBB- by Standard and Poors or an equivalent rating, also termed below investment grade, is generally subject to higher yields but to greater risks too.

Interest rate risk - When interest rates rise, bond values generally fall. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality.

Issuer concentration risk - To the extent that a portfolio invests a large portion of its assets in securities from a relatively small number of issuers, its performance will be more strongly affected by events affecting those issuers.

Liquidity risk - Any security could become hard to value or to sell at a desired time and price.

Prepayment and extension risk - With mortgage- and asset-backed securities, or any other securities whose market prices typically reflect the assumption that the securities will be paid off before maturity, any unexpected behaviour in interest rates could impact portfolio performance.

Sector concentration risk - The performance of a portfolio that invests a large portion of its assets in a particular economic sector (or, for bond portfolios, a particular market segment), will be more strongly affected by events affecting that sector or segment of the fixed income market.

General Portfolio Risks

Capital risk - The value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the portfolio and the currency in which you subscribed, if different. **Counterparty risk** - An entity with which the portfolio transacts may not meet its obligations to the portfolio. **Geographic concentration risk** - To the extent that a portfolio invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - A portfolio's attempts to reduce or eliminate certain risks through hedging may not work as intended. **Investment portfolio risk** - Investing in portfolios involves certain risks an investor would not face if investing in markets directly. **Management risk** - The investment manager or its designees may at times find their obligations to a portfolio to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - Operational failures could lead to disruptions of portfolio operations or financial losses.
