

## Blue Chip Growth Portfolio-II

**Total Large-Cap Growth Assets:** \$254.1 billion | **Total Strategy Assets:**<sup>1</sup> \$95.2 billion | **Total Portfolio Assets:** \$1.9 billion

### INVESTMENT APPROACH

- Seek to identify high-quality companies with leading market positions in fertile growth fields. Integrate fundamental research - emphasize sustainable growth, not momentum growth.
- Focus on high-quality earnings, above-average earnings and free cash flow growth, shareholder-oriented management, and rational competitive environments.
- Avoid overpaying for growth, and diversification within portfolios can help manage portfolio risk.
- The fund is subject to the volatility inherent in common stock investing, and its share price may fluctuate more than a fund investing in non-growth oriented stocks. Diversification cannot assure a profit or protect against loss in a declining market. The fund is "nondiversified," meaning it may invest a greater portion of its assets in a single company and own more of the company's voting securities than is permissible for a "diversified" fund. The fund's share price can be expected to fluctuate more than that of a comparable diversified fund.

### PORTFOLIO CONSTRUCTION

- Typically 75-125 stock portfolio
- Individual position sizes are typically +/-5% relative to S&P 500 Index and the Russell 1000 Growth Index weightings.
- Sector weights typically range from 0.5X to 3.0X for primary S&P 500 Index sectors and the Russell 1000 Growth Index sectors.

### BENCHMARK

- S&P 500 Index
- Russell 1000 Growth Index
- Lipper Variable Annuity Underlying Large-Cap Growth Funds Average

**Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com).** The Portfolio's total return figures reflect the reinvestment of dividends and capital gains, if any.

**Figures shown do not reflect fees at the insurance product or contract level; if these fees were included, returns would be lower.**

The Portfolio's net expense ratio as of the most recent prospectus was **1.00%**. For information about the expenses and waivers, see the prospectus for details.

Lipper rankings are based on cumulative total return. The Lipper Average consists of all share classes; each share class is counted separately.

**Investors should note that the Portfolio's short-term performance is highly unusual and unlikely to be sustained.**

RISK/RETURN CHARACTERISTICS

Five Years ended December 31, 2023

Past performance is not a reliable indicator of future performance. Figures are calculated using monthly data and are net of fees.

**ADDITIONAL DISCLOSURES**

Portfolio Construction: There is no guarantee that the investment will remain within the anticipated ranges of exposure.

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.

**Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit [troweprice.com](https://www.troweprice.com). Read it carefully.**
