Total Strategy Assets:¹ \$14.2 billion | **Total Fund Assets:** \$611.0 million

INVESTMENT APPROACH

- Employ fundamental analysis to identify companies with sustainable above-market earnings growth rates.
- Focus on franchise strength, management team quality, free cash flow, and financing/balance sheet structure.
- Verify relative valuation appeal versus both local market and broad sector opportunity set.
- Apply negative screening for macroeconomic and political factors to temper bottom-up enthusiasm for specific securities.
- International investments can be riskier than U.S. investments due to the adverse effects of currency exchange rates, differences in market structure and liquidity, as well as specific country, regional, and economic developments. These risks are generally greater for investments in emerging markets.

PORTFOLIO CONSTRUCTION

- Typically 80-100 stocks
- Typical bet size range from 0.4%-4.0%
- Country ranges +/- 10% absolute deviation from the benchmark
- Sector ranges +/- 15% absolute deviation from the benchmark
- Reserves are typically less than 5%
- Expected Turnover range: 20-50%

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit [troweprice.com](https://www.troweprice.com). The Fund's total return figures reflect the reinvestment of dividends and capital gains, if any.

The Fund's expense ratio as of the most recent prospectus was **1.00%**. See the prospectus for details.

Lipper rankings are based on cumulative total return. The Lipper Average consists of all share classes; each share class is counted separately.

ADDITIONAL DISCLOSURES

Portfolio Construction: There is no guarantee that the investment will remain within the anticipated ranges of exposure.

Active Share is a holdings based measure of active management representing the percentage of a portfolio's holdings that differ from those in its benchmark. Compared to tracking error, which measures the standard deviation of the difference in a manager's returns versus the Benchmark returns, Active Share allows investors to get a clearer understanding of what a manager is doing to drive performance, rather than drawing conclusions from observed returns. The greater the difference between the asset composition of a product and its benchmark, the greater the active share is.

Consider the investment objectives, risks, and charges and expenses carefully before investing. For a prospectus or, if available, a summary prospectus containing this and other information, call 1-800-638-7780 or visit [troweprice.com](https://www.troweprice.com). Read it carefully.
