INVEST WITH CONFIDENCE®

## Investment Objective(s)

The fund seeks to provide preservation of capital, liquidity, and, consistent with these objectives, the highest level of income exempt from federal and Maryland state and local income taxes.

## Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the fund. **You may also incur brokerage commissions and other charges when buying or selling shares of the fund, which are not reflected in the table or example below.**

### Fees and Expenses of the Fund

	Investor Class	I Class
<b>Shareholder fees (fees paid directly from your investment)</b>		
Maximum account fee	\$20 <sup>a</sup>	—
<b>Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)</b>		
Management fees	0.19 %	0.19 %
Other expenses	0.55	0.32 <sup>b</sup>
Total annual fund operating expenses	0.74	0.51
Fee waiver/expense reimbursement	(0.33) <sup>c</sup>	(0.27) <sup>b</sup>
<b>Total annual fund operating expenses after fee waiver/expense reimbursement</b>	<b>0.41 <sup>c</sup></b>	<b>0.24 <sup>b</sup></b>

<sup>a</sup> Subject to certain exceptions and account minimums, accounts are charged an annual \$20 fee.

<sup>b</sup> T. Rowe Price Associates, Inc., has contractually agreed (through April 30, 2027) to pay the operating expenses of the fund's I Class excluding management fees; interest; expenses related to borrowings, taxes, and brokerage; nonrecurring, extraordinary expenses; and acquired fund fees and expenses (I Class Operating Expenses), to the extent the I Class Operating Expenses exceed 0.05% of the class' average daily net assets. The agreement may only be terminated at any time after April 30, 2027, with approval by the fund's Board of Directors. Any expenses paid under this agreement (and any applicable prior limitations) are subject to reimbursement to T. Rowe Price Associates, Inc., by the class whenever the I Class Operating Expenses are below 0.05%. However, the class will not reimburse T. Rowe Price Associates, Inc., more than three years from the date such amounts were initially waived or paid. The class may only reimburse T. Rowe Price Associates, Inc., if the reimbursement does not cause the I Class Operating Expenses (after the reimbursement is taken into account) to exceed the current expense limitation on I Class Operating Expenses (or the expense limitation in place at the time the amounts were waived or paid).

<sup>c</sup> T. Rowe Price Associates, Inc., has contractually agreed (through April 30, 2027) to waive its fees and/or bear any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; nonrecurring, extraordinary expenses; and acquired fund fees and expenses) that would cause the class' ratio of expenses to average daily net assets to exceed 0.41%. The agreement may only be terminated at any time after April 30, 2027, with approval by the fund's Board of Directors. Fees waived and expenses paid under this agreement (and any applicable prior limitations) are subject to reimbursement to T. Rowe Price Associates, Inc., by the class whenever the class' expense ratio is below 0.41%. However, the class will not reimburse T. Rowe Price Associates, Inc., more than three years from the date such amounts were initially waived or paid. The class may only reimburse T. Rowe Price Associates, Inc., if the reimbursement does not cause the class' expense ratio (after the reimbursement is taken into account) to exceed the class' current expense limitation (or the expense limitation in place at the time the amounts were waived or paid).

**Example** This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's operating expenses remain the

same. The example also assumes that any current expense limitation arrangement remains in place for the period noted in the previous table; therefore, the figures have been adjusted to reflect fee waivers or expense reimbursements only in the periods for which the expense limitation arrangement is expected to continue. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
<b>Investor Class</b>	\$ 42	\$ 203	\$ 379	\$ 887
<b>I Class</b>	25	136	258	614

## Investments, Risks, and Performance

### Principal Investment Strategies

Effective August 1, 2026, the T. Rowe Price Maryland Tax-Free Money Fund will change its name to the T. Rowe Price Maryland Municipal Money Fund.

The fund invests at least 65% of its total assets in Maryland municipal securities, and normally at least 80% of the fund's income is expected to be exempt from federal and Maryland state and local income taxes. Subject to shareholder approval, the fund's Board of Directors has approved changing the fund's 80% investment policy and related policy to invest at least 65% of total assets in Maryland municipal securities to the following: "The fund normally invests at least 80% of its net assets (plus any borrowings for investment purposes) in municipal money market securities whose income is exempt from regular federal and Maryland state income taxes." If approved by shareholders, the new 80% investment policy is expected to become effective on August 1, 2026.

The fund is a retail money market fund managed in compliance with Rule 2a-7 under the Investment Company Act of 1940. The securities purchased by the fund are subject to the maturity, credit quality, diversification, liquidity, and other requirements of Rule 2a-7. All securities purchased by the fund present minimal credit risk in the opinion of T. Rowe Price.

The fund is managed to provide a stable share price of \$1.00 by investing in high-quality U.S. dollar-denominated municipal money market securities. Money market securities are generally high-quality, short-term obligations issued by companies or governmental entities. The fund's weighted average maturity will not exceed 60 calendar days, the fund's weighted average life will not exceed 120 calendar days, and the fund will not purchase any security with a remaining maturity longer than 397 calendar days (unless otherwise permitted by Rule 2a-7, such as certain variable and floating rate instruments).

The fund also has a policy that up to 20% of the fund's income could be derived from securities subject to the alternative minimum tax. Subject to shareholder approval, the fund's Board of Directors has approved eliminating this policy. If approved by shareholders, the elimination of the alternative minimum tax policy is expected to become effective on August 1, 2026.

Because the change to the fund's 80% investment policy and elimination of the alternative minimum tax policy require shareholder approval to become effective, the changes are being proposed for approval at a special shareholder meeting scheduled for June 25, 2026. All

shareholders who held shares of the fund at the close of business on March 27, 2026, are eligible to vote on the proposed changes.

The proposed changes are intended to provide the fund with greater long-term flexibility in executing its investment program, align the policies with the fund's new name, and reduce potential compliance risks for the fund, although the changes are not expected to substantially affect the way the fund is currently managed. Proxy materials for the special shareholder meeting describe the proposed changes and the rationale in greater detail. If either proposed change is not approved by shareholders, the name change will still become effective on August 1, 2026.

In selecting securities for the fund, the portfolio manager may examine relationships among yields of various types and maturities of money market securities in the context of interest rate outlooks. The fund's yield will fluctuate with changes in short-term interest rates.

In addition to investing in state and local general obligation bonds, the fund may invest a significant portion of its assets in sectors with special risks, such as health care, transportation, and utilities, as well as private activity bonds (including industrial revenue bonds), which are municipal bonds issued by a government agency on behalf of a private sector company and, in most cases, are not backed by the credit of the issuing municipality. It is possible that 25% or more of the fund's assets could be invested in municipal securities that would tend to respond similarly to particular economic or political developments. For example, the fund may invest in securities of issuers whose revenues are generated from similar types of projects or operate in similar industries. The fund may at times invest more than 25% of its net assets overall in industrial revenue bonds, but investments in industrial revenue bonds related to the same industry may not exceed 25% of the fund's net assets. Bonds that are refunded with escrowed U.S. government securities are not subject to the 25% limitation. Refunded bonds may have originally been issued as general obligation or revenue bonds, but become "refunded" when they are secured by an escrow fund, usually consisting entirely of direct U.S. government obligations, U.S. government agency obligations, and/or cash.

Due to fluctuations in the availability of suitable Maryland municipal securities or other reasons, the fund may invest in other municipal securities whose interest is exempt from federal but not Maryland income taxes. While efforts will be made to minimize such investments, they could comprise up to 10% of the fund's annual income.

### **Principal Risks**

As with any fund, there is no guarantee that the fund will achieve its objective(s). **You could lose money by investing in the fund. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The fund may impose a fee upon the sale of your shares. An investment in the fund is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. T. Rowe Price Associates, Inc., is not required to reimburse the fund for losses, and you should not expect that T. Rowe Price Associates, Inc., will provide financial support to the fund at any time, including during periods of market stress.**

Some money market funds have experienced significant pressures from shareholder redemptions, issuer credit downgrades, illiquid markets, and historically low yields on the

securities they can hold. There have been a very small number of money market funds in other fund companies that have “broken the buck,” which means that those funds’ investors did not receive \$1.00 per share for their investment in those funds. The potential for realizing a loss of principal in the fund could derive from:

**State-specific focus:** Because the fund focuses its investments on securities issued by Maryland and its municipalities, it is more susceptible to unfavorable developments in Maryland than funds that invest in municipal securities of many states. The fund’s performance will depend heavily on the financial strength and economic conditions of the State of Maryland, its localities, and its agencies, and any adverse tax, legislative, or political developments may have far-reaching impacts on the overall Maryland municipal securities market. A bond default or credit rating downgrade, or even negative perceptions of the ability to make timely bond payments, involving even a small number of Maryland municipal securities issuers could affect the market values and marketability of all Maryland municipal securities.

**Municipal securities:** The fund may be highly impacted by events tied to the overall municipal securities markets, which can be very volatile and significantly affected by unfavorable legislative or political developments and adverse changes in the financial conditions of municipal securities issuers and the global, national, and/or local economies. Income from municipal securities held by the fund could become taxable because of changes in tax laws or interpretations by taxing authorities, or noncompliant conduct of a state or municipality. Other changes in tax laws, including changes to individual or corporate tax rates, could alter the attractiveness and overall demand for municipal bonds.

Certain sectors of the municipal bond market have special risks and could be affected by certain developments more significantly than the market as a whole. For example: health care can be negatively impacted by rising expenses and dependency on third party reimbursements; transportation can be negatively impacted by declining revenues or unexpectedly high construction or fuel costs; utilities are subject to governmental rate regulation; and private activity bonds (including industrial development bonds) rely on project revenues and the creditworthiness of the corporate user as opposed to governmental support. Investing significantly in municipal obligations backed by revenues of similar types of industries or projects may make the fund more susceptible to developments affecting those industries and projects.

**Stable net asset value:** The fund may not be able to maintain a stable \$1.00 share price at all times. The fund’s shareholders should not rely on or expect the fund’s investment adviser or an affiliate to purchase distressed assets from the fund, enter into capital support agreements with the fund, make capital infusions into the fund, or take other actions to help the fund maintain a stable \$1.00 share price.

**Market conditions:** The value of the fund’s investments may decrease, sometimes rapidly or unexpectedly, due to factors affecting an issuer held by the fund, particular industries, or the overall securities markets. A variety of factors can increase the volatility of the fund’s holdings and markets generally, including geopolitical developments (such as trade and tariff arrangements, sanctions, and cybersecurity attacks), recessions, inflation, rapid interest rate changes, war, military conflict, acts of terrorism, natural disasters, and outbreaks of infectious

illnesses or other widespread public health issues (such as the coronavirus pandemic) and related governmental and public responses. Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others. Government intervention in markets may impact interest rates, market volatility, and security pricing. These adverse developments may cause broad declines in market value due to short-term market movements or for significantly longer periods during more prolonged market downturns.

**Redemptions:** The fund may be subject to periods of increased redemptions that could cause the fund to sell its assets at disadvantageous times or at a depressed value or loss, particularly during periods of declining or illiquid markets, and that could affect the fund's ability to maintain a stable \$1.00 share price.

**Liquidity:** The fund may not be able to sell a holding in a timely manner at its current carrying value. Periods of reduced liquidity in money markets could require the fund to liquidate its assets at inopportune times or at a depressed value, cause the fund to be unable to meet redemption requests without dilution of the remaining shareholders' interests in the fund, and potentially affect the fund's ability to maintain a \$1.00 share price. In addition, the fund's Board of Directors (or its delegate) has discretion to impose a liquidity fee if it determines that doing so is in the best interest of the fund.

**Credit quality:** An issuer of a debt instrument or a provider of credit support could suffer an adverse change in financial condition that results in a payment default (failure to make scheduled interest or principal payments), a rating downgrade, or an inability to meet a financial obligation. Although the fund only purchases securities that present minimal credit risk in the opinion of T. Rowe Price, the credit quality of the fund's holdings could change rapidly during periods of market stress.

**Interest rates:** A decline in interest rates may lower the fund's yield, or a rise in the overall level of interest rates may cause a decline in the prices of fixed income securities held by the fund. The fund's yield will vary; it is not fixed for a specific period like the yield on a bank certificate of deposit. This is a disadvantage when interest rates are falling because the fund would have to reinvest proceeds of maturing securities at lower interest rates. During periods of extremely low short-term interest rates, the fund may not be able to maintain a positive yield. An elevated inflation environment may heighten risks associated with rising interest rates. In addition, the adoption of more stringent regulations governing the management of money market funds could have a negative effect on the fund's yield.

**Alternative minimum tax:** Although the fund seeks to distribute tax-exempt income, a portion of the fund's otherwise tax-exempt dividends may be taxable to those shareholders subject to the federal alternative minimum tax.

**Cybersecurity breaches:** The fund could be harmed by intentional cyberattacks and other cybersecurity breaches, including unauthorized access to the fund's assets, confidential information, or other proprietary information. In addition, a cybersecurity breach could cause one

of the fund's service providers or financial intermediaries to suffer unauthorized data access, data corruption, or loss of operational functionality.

## Performance

The following performance information provides some indication of the risks of investing in the fund. The fund's performance information represents only past performance and is not necessarily an indication of future results.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund's Investor Class. Returns for other share classes vary since they have different expenses.

### MARYLAND TAX-FREE MONEY FUND

#### Calendar Year Returns

The following table shows the average annual total returns for each class of the fund that has been in operation for at least one full calendar year. In addition, the table also includes a comparative index that has investment characteristics similar to those of the fund.

#### Average Annual Total Returns

Investor Class	Periods ended December 31, 2025				Inception date
	1 Year	5 Years	10 Years	Since inception	
					03/30/2001
I Class	2.29 %	1.74 %	1.15 %	— %	07/06/2017
	2.46	1.88	—	1.45	
Lipper Other States Tax-Exempt Money Market Funds Average	2.39	1.86	1.28	1.45 <sup>a</sup>	

<sup>a</sup> Return since 6/30/17.

## Management

**Investment Adviser** T. Rowe Price Associates, Inc. (T. Rowe Price or Price Associates)

Name	Title	Managed Fund Since	Joined Investment Adviser
Alexander Obaza	Co-Portfolio Manager and Cochair of Investment Advisory Committee	2023	2005
Chen Shao	Co-Portfolio Manager and Cochair of Investment Advisory Committee	2024	2005

## Purchase and Sale of Fund Shares

The Investor Class generally requires a \$2,500 minimum initial investment (\$1,000 minimum initial investment if opening an IRA, a custodial account for a minor, or a small business retirement plan account). Additional purchases generally require a \$100 minimum. These investment minimums generally are waived for financial intermediaries and certain employer-sponsored retirement plans submitting orders on behalf of their customers.

The I Class requires a \$500,000 minimum initial investment per fund per account registration, although the initial investment minimum generally is waived or reduced for financial intermediaries, eligible retirement plans, certain accounts for which T. Rowe Price or its affiliates have discretionary investment authority, qualifying directly held accounts, and certain other accounts.

For investors holding shares of the fund directly with T. Rowe Price, you may purchase, redeem, or exchange fund shares by mail; by telephone (1-800-225-5132 for IRAs and nonretirement accounts; 1-800-492-7670 for small business retirement plans; and 1-800-638-8790 for institutional investors and financial intermediaries); or, for certain other accounts, by accessing your account online through [troweprice.com](https://www.troweprice.com).

If you hold shares through a financial intermediary or retirement plan, you must purchase, redeem, and exchange shares of the fund through your intermediary or retirement plan. You should check with your intermediary or retirement plan to determine the investment minimums that apply to your account.

In accordance with the requirements for "retail money market funds" under Rule 2a-7, the fund has implemented policies and procedures designed to limit accounts to only those beneficially owned by natural persons. The fund has also obtained assurances from financial intermediaries that sell the fund that they have developed adequate procedures to limit accounts to only those beneficially owned by natural persons. Any new investors wishing to purchase shares will be required to demonstrate eligibility (for example, by providing their Social Security number). The fund will, upon advance written notification, involuntarily redeem investors that do not satisfy these eligibility requirements.

The fund may charge a liquidity fee of up to 2% of the value of shares redeemed if the fund's Board of Directors (or its delegate) determines that doing so is in the best interests of the fund.

**Tax Information**

The fund declares dividends, if any, daily and pays them on the first business day of each month. Any capital gains are declared and paid annually, usually in December. The fund intends to distribute income that is exempt from federal and Maryland income taxes. However, a portion of the fund's distributions may be subject to income taxes or the alternative minimum tax. A redemption or exchange of fund shares, and any capital gains distributed by the fund, may be taxable.

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
