

## **T. Rowe Price Global Consumer Fund**

Supplement to Prospectus and Summary Prospectus dated May 1, 2022

---

The following updates are effective immediately.

In the Summary Prospectus and Section 1 of the Prospectus, the portfolio manager table under “Management” is supplemented as follows:

Vivian Si will be on maternity leave and not involved in the day-to-day management of the fund. During the time Ms. Si is on maternity leave, Ann Holcomb will serve as interim portfolio manager and chair of the fund’s Investment Advisory Committee and be primarily responsible for the day-to-day management of the fund’s portfolio. Ms. Holcomb joined T. Rowe Price in 1996. Ms. Si is expected to return and resume her role on or about May 22, 2023.

In Section 2 of the Prospectus, the disclosure under “Portfolio Management” is supplemented as follows:

Vivian Si will be on maternity leave and not involved in the day-to-day management of the fund. During the time Ms. Si is on maternity leave, Ann Holcomb will serve as interim portfolio manager and chair of the fund’s Investment Advisory Committee and be primarily responsible for the day-to-day management of the fund’s portfolio. Ms. Holcomb joined the Firm in 1996, and her investment experience dates from 1995. During the past five years, she has served as a Director of Research, North America and a portfolio manager. Ms. Si is expected to return and resume her role on or about May 22, 2023.

---

The date of this supplement is March 13, 2023.

## SUMMARY PROSPECTUS

May 1, 2022

PGLOX

T. ROWE PRICE

Global Consumer Fund

The Securities and Exchange Commission (SEC) has not approved or disapproved these securities or passed upon the adequacy of this prospectus. Any representation to the contrary is a criminal offense.

Before you invest, you may want to review the fund's prospectus, which contains more information about the fund and its risks. You can find the fund's prospectus, shareholder reports, and other information about the fund online at [troweprice.com/prospectus](https://www.troweprice.com/prospectus). You can also get this information at no cost by calling **1-800-638-5660**, by sending an e-mail request to [info@troweprice.com](mailto:info@troweprice.com), or by contacting your financial intermediary. This Summary Prospectus incorporates by reference the fund's prospectus, dated May 1, 2022, as amended or supplemented, and Statement of Additional Information, dated May 1, 2022, as amended or supplemented.

## Investment Objective(s)

The fund seeks to provide long-term growth of capital.

## Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the fund. **You may also incur brokerage commissions and other charges when buying or selling shares of the fund, which are not reflected in the table or example below.**

### Fees and Expenses of the Fund

Shareholder fees (fees paid directly from your investment)	
Maximum account fee	\$20 <sup>a</sup>
Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management fees	0.68 %
Other expenses	0.47
Total annual fund operating expenses	1.15
Fee waiver/expense reimbursement	(0.10) <sup>b</sup>
<b>Total annual fund operating expenses after fee waiver/expense reimbursement</b>	<b>1.05<sup>b</sup></b>

<sup>a</sup> Subject to certain exceptions, accounts with a balance of less than \$10,000 are charged an annual \$20 fee.

<sup>b</sup> T. Rowe Price Associates, Inc., has contractually agreed (through April 30, 2023) to waive its fees and/or bear any expenses (excluding interest; expenses related to borrowings, taxes, and brokerage; nonrecurring, extraordinary expenses; and acquired fund fees and expenses) that would cause the class' ratio of expenses to average daily net assets to exceed 1.05%. The agreement may only be terminated at any time after April 30, 2023, with approval by the fund's Board of Directors. Fees waived and expenses paid under this agreement (and a previous limitation of 1.05%) are subject to reimbursement to T. Rowe Price Associates, Inc., by the fund whenever the class' expense ratio is below 1.05%. However, no reimbursement will be made more than three years from the date such amounts were initially waived or reimbursed. The fund may only make repayments to T. Rowe Price Associates, Inc., if such repayment does not cause the class' expense ratio (after the repayment is taken into account) to exceed the lesser of: (1) the expense limitation in place at the time such amounts were waived or (2) the class' current expense limitation.

**Example** This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's operating expenses remain the same. The example also assumes that any current expense limitation arrangement remains in place for the period noted in the previous table; therefore, the figures have been adjusted to reflect fee waivers or expense reimbursements only in the periods for which the expense limitation arrangement is expected to continue. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
	\$ 107	\$ 355	\$ 623	\$ 1,389

**Portfolio Turnover** The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate

higher transaction costs and may result in higher taxes when the fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 62.2% of the average value of its portfolio.

## **Investments, Risks, and Performance**

### **Principal Investment Strategies**

The fund will normally invest at least 80% of its net assets (including any borrowings for investment purposes) in securities issued by companies in the consumer sector. Under normal conditions, the fund will invest at least 40% of its net assets (unless foreign market conditions are not deemed favorable by the investment adviser, in which case the fund would invest at least 30% of its net assets) in securities issued by companies organized or located outside the U.S., including securities of emerging market issuers. For purposes of determining whether the fund invests at least 40% of its net assets (at least 30% of its net assets if market conditions are not deemed favorable) outside the U.S., the fund relies on the country assigned to a security by MSCI Inc. or another unaffiliated data provider.

For purposes of the fund's 80% investment policy, the fund generally targets companies in the consumer staples and consumer discretionary sectors (excluding automobiles and components companies), as they are classified by one or more widely recognized third-party providers and/or as defined by the investment adviser. The fund seeks to invest in various companies engaged in the research, development, manufacture, distribution, supply or sale of consumer products, services, or equipment. The fund invests in a wide variety of industries within the overall consumer sector. For example, potential investments within the consumer staples sector may include companies involved in activities related to household and personal products; packaged foods and meats; and food and drug retail. Potential investments within the consumer discretionary sector may include companies involved in activities related to apparel, accessories and luxury goods; internet, cable and satellite; and home improvement.

The adviser has flexibility in allocating investments between the consumer staples and consumer discretionary sectors and seeks to identify the best risk-adjusted opportunities for the fund based on market conditions and consumer sentiment. Consumer staples and consumer discretionary stocks tend to perform well over different parts of the economic cycle. For example, when deciding upon allocations between the consumer staples and consumer discretionary sectors, the adviser may generally favor consumer staples companies if the adviser believes that consumer sentiment towards the economy is negative or declining, and may generally favor consumer discretionary companies if the adviser believes that consumer sentiment towards the economy is positive or rising.

Stock selection is based on intensive fundamental research that assesses industry trends and companies' long-term prospects. The fund may purchase securities issued by companies of any size but generally seeks companies the portfolio manager believes are well-positioned in their industry. The adviser may use both growth and value approaches in selecting investments for the fund, and the adviser generally selects stocks with the most favorable combination of company fundamentals and valuation. In the growth area, the adviser may seek companies with capable management, attractive business niches, sound financial and accounting practices,

and/or a demonstrated ability to increase revenues, earnings, and cash flow consistently. In the value area, the adviser may seek companies whose current stock prices appear undervalued in terms of earnings, projected cash flow, or asset value per share, that have appreciation potential temporarily unrecognized by the market, or that may be temporarily out of favor.

The fund is “nondiversified,” meaning it may invest a greater portion of its assets in fewer issuers than is permissible for a “diversified” fund.

### **Principal Risks**

As with any fund, there is no guarantee that the fund will achieve its objective(s). The fund’s share price fluctuates, which means you could lose money by investing in the fund. The principal risks of investing in this fund, which may be even greater in bad or uncertain market conditions, are summarized as follows:

**Consumer-related companies** A fund that focuses its investments in specific industries or sectors is more susceptible to adverse developments affecting those industries and sectors than a more broadly diversified fund. Because the fund invests significantly in companies connected to the consumer staples and consumer discretionary sectors, the fund may perform poorly during a downturn in one or more consumer-related industries and is more exposed to the economic, business or other developments that could adversely impact those industries. Companies involved with consumer products, services, or equipment can be significantly affected by general economic trends, as well as by changes in consumer sentiment, demographics and product trends, product cycles, government regulation and import controls, labor relations, intense global competition, and social trends and marketing campaigns. Companies in the consumer staples sector can be particularly affected by the cost of commodities and production, and companies in the consumer discretionary sector can be significantly affected by disposable household income and consumer spending habits, as well as technological obsolescence. Overall, the consumer staples sector should be less cyclical and less impacted by changes in economic conditions than the consumer discretionary sector.

**International investing** Investing in the securities of non-U.S. issuers involves special risks not typically associated with investing in U.S. issuers. Non-U.S. securities tend to be more volatile and have lower overall liquidity than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. In addition, investments outside the U.S. are subject to settlement practices and regulatory and financial reporting standards that differ from those of the U.S. The risks of investing outside the U.S. are heightened for any investments in emerging markets, which are susceptible to greater volatility than investments in developed markets.

**Investment style** Because the fund may hold stocks with either growth or value characteristics, it could underperform other funds that take a strictly growth or value approach to investing when one style is currently in favor. Growth stocks tend to be more volatile than the overall stock market and can have sharp price declines as a result of earnings disappointments. Value stocks carry the risk that the market will not recognize their intrinsic value or that they are actually appropriately priced at a low level.

**Market conditions** The value of the fund's investments may decrease, sometimes rapidly or unexpectedly, due to factors affecting an issuer held by the fund, particular industries, or the overall securities markets. A variety of factors can increase the volatility of the fund's holdings and markets generally, including political or regulatory developments, recessions, inflation, rapid interest rate changes, war, military conflict, or acts of terrorism, natural disasters, and outbreaks of infectious illnesses or other widespread public health issues such as the coronavirus pandemic and related governmental and public responses (including sanctions). Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others. Government intervention in markets may impact interest rates, market volatility, and security pricing. These adverse developments may cause broad declines in market value due to short-term market movements or for significantly longer periods during more prolonged market downturns.

**Stock investing** Stocks generally fluctuate in value more than bonds and may decline significantly over short time periods. There is a chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising and falling prices. The value of stocks held by the fund may decline due to general weakness or volatility in the stock markets in which the fund invests or because of factors that affect a particular company or industry.

**Nondiversification** As a nondiversified fund, the fund has the ability to invest a larger percentage of its assets in the securities of a smaller number of issuers than a diversified fund. As a result, poor performance by a single issuer could adversely affect fund performance more than if the fund were invested in a larger number of issuers. The fund's share price can be expected to fluctuate more than that of a similar fund that is more broadly diversified.

**Active management** The fund's overall investment program and holdings selected by the fund's investment adviser may underperform the broad markets, relevant indices, or other funds with similar objectives and investment strategies.

**Cybersecurity breaches** The fund could be harmed by intentional cyberattacks and other cybersecurity breaches, including unauthorized access to the fund's assets, customer data and confidential shareholder information, or other proprietary information. In addition, a cybersecurity breach could cause one of the fund's service providers or financial intermediaries to suffer unauthorized data access, data corruption, or loss of operational functionality.

## **Performance**

The following performance information provides some indication of the risks of investing in the fund. The fund's performance information represents only past performance (before and after taxes) and is not necessarily an indication of future results.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund.

**GLOBAL CONSUMER FUND**

Calendar Year Returns

	Quarter Ended	Total Return		Quarter Ended	Total Return
Best Quarter	6/30/20	23.79%	Worst Quarter	3/31/20	-15.93%

The following table shows the average annual total returns for the fund, and also compares the returns with the returns of a relevant broad-based market index, as well as with the returns of one or more comparative indexes that have investment characteristics similar to those of the fund, if applicable.

In addition, the table shows hypothetical after-tax returns to demonstrate how taxes paid by a shareholder may influence returns. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their fund shares through tax-deferred arrangements, such as a 401(k) account or an IRA.

**Average Annual Total Returns**

	Periods ended December 31, 2021			Inception date 06/27/2016
	1 Year	5 Years	Since inception	
<b>Global Consumer Fund</b>				
Returns before taxes	8.94 %	14.85 %	13.73%	
Returns after taxes on distributions	6.72	14.04	12.96	
Returns after taxes on distributions and sale of fund shares	5.91	11.72	10.84	
MSCI All Country World Index Consumer Discretionary & Consumer Staples ex Automobile & Components Net (reflects no deduction for fees or expenses)	6.88	12.81	12.35 <sup>a</sup>	
MSCI All Country World Index Net (reflects no deduction for fees or expenses)	18.54	14.40	15.34 <sup>a</sup>	

<sup>a</sup> Return since 6/27/16.

Updated performance information is available through [troweprice.com](http://troweprice.com).

**Management**

**Investment Adviser** T. Rowe Price Associates, Inc. (T. Rowe Price or Price Associates)

<b>Portfolio Manager</b>	<b>Title</b>	<b>Managed Fund Since</b>	<b>Joined Investment Adviser</b>
Vivian Si	Chair of Investment Advisory Committee	2021	2012

**Purchase and Sale of Fund Shares**

The fund generally requires a \$2,500 minimum initial investment (\$1,000 minimum initial investment if opening an IRA, a custodial account for a minor, or a small business retirement plan account). Additional purchases generally require a \$100 minimum. These investment minimums generally are waived for financial intermediaries and certain employer-sponsored retirement plans submitting orders on behalf of their customers.

For investors holding shares of the fund directly with T. Rowe Price, you may purchase, redeem, or exchange fund shares by mail; by telephone (1-800-225-5132 for IRAs and nonretirement accounts; 1-800-492-7670 for small business retirement plans; and 1-800-638-8790 for institutional investors and financial intermediaries); or, for certain accounts, by accessing your account online through [troweprice.com](http://troweprice.com).

If you hold shares through a financial intermediary or retirement plan, you must purchase, redeem, and exchange shares of the fund through your intermediary or retirement plan. You should check with your intermediary or retirement plan to determine the investment minimums that apply to your account.

**Tax Information**

Any dividends or capital gains are declared and paid annually, usually in December. Redemptions or exchanges of fund shares and distributions by the fund, whether or not you reinvest these amounts in additional fund shares, generally may be taxed as ordinary income or capital gains unless you invest through a tax-deferred account (in which case you will be taxed upon withdrawal from such account).

**Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the fund through a broker-dealer or other financial intermediary (such as a bank), the fund and its related companies may pay the intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
