Supplement to Prospectuses and Summary Prospectuses dated May 1, 2023

---

At a meeting held on October 23, 2023, the fund's Board of Directors approved an amendment to the fund's investment management agreement to change the fund's fee structure from an all-inclusive fee structure to one where the management fee covers only investment management and other specified services, but operating expenses (including payments for administrative services) are borne by the fund, effective May 1, 2024 (the "Fee Restructure").

In addition, because the management fee and operating expenses may fluctuate under the Fee Restructure, the fund's Board of Directors approved implementing an indefinite contractual total expense limitation at the level of the fund's current all-inclusive fee rate (including any management fee waivers), excluding interest, taxes, brokerage and other transaction costs, and nonrecurring and extraordinary expenses (expenses currently excluded from the fund's all-inclusive fee rate).

As a result, the fund will be subject to the same or lower total expenses relative to the all-inclusive fee rate (including any management fee waivers) to which it is subject today.

The summary prospectus and prospectus will be updated to reflect these changes on or about May 1, 2024.

---

The date of this supplement is December 1, 2023.

## **T. Rowe Price Limited-Term Bond Portfolio**

Supplement to Prospectus and Summary Prospectus dated May 1, 2023

---

In the Summary Prospectus and Section 1 of the Prospectus, the portfolio manager table under “Management” is supplemented as follows:

Effective October 1, 2023, Steven M. Kohlenstein will join Michael F. Reinartz as the fund’s co-portfolio manager and cochair of the fund’s Investment Advisory Committee. Mr. Kohlenstein joined T. Rowe Price in 2010.

In Section 2 of the Prospectus, the disclosure under “Portfolio Management” is supplemented as follows:

Effective October 1, 2023, Steven M. Kohlenstein will join Michael F. Reinartz as the fund’s co-portfolio manager and cochair of the fund’s Investment Advisory Committee. Mr. Kohlenstein joined the Firm in 2010, and his investment experience dates from 2011. During the past five years, he has served as a portfolio manager, portfolio investment strategist and quantitative analyst in the Fixed Income Division.

---

The date of this supplement is September 28, 2023.

This Summary Prospectus incorporates by reference the fund's prospectus, dated May 1, 2023, as amended or supplemented, and Statement of Additional Information, dated May 1, 2023, as amended or supplemented.</p>	

**INVEST WITH CONFIDENCE®**

### Investment Objective(s)

The fund seeks a high level of income consistent with moderate fluctuations in principal value.

### Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the fund. **There may be additional expenses that apply, as described in your insurance contract prospectus, which are not reflected in the table or example below.**

#### Fees and Expenses of the Fund

	Portfolio	Portfolio—II Class
<b>Annual fund operating expenses (expenses that you pay each year as a percentage of the value of your investment)</b>		
Management fees	0.70 % <sup>a</sup>	0.70 % <sup>a</sup>
Distribution and service (12b-1) fees	—	0.25
Other expenses	—	—
Total annual fund operating expenses	0.70	0.95
Fee waiver/expense reimbursement	(0.20 ) <sup>a</sup>	(0.20 ) <sup>a</sup>
<b>Total annual fund operating expenses after fee waiver/expense reimbursement</b>	<b>0.50 <sup>a</sup></b>	<b>0.75 <sup>a</sup></b>

<sup>a</sup> T. Rowe Price Associates, Inc., has contractually agreed (at least through April 30, 2024) to waive a portion of the fund's management fees in order to limit the fund's management fees to 0.50% of the fund's average daily net assets. Thereafter, this agreement will automatically renew for one-year terms unless terminated or modified by the fund's Board of Directors. Any fees waived under this agreement are not subject to reimbursement to T. Rowe Price Associates, Inc., by the fund.

**Example** This example is intended to help you compare the cost of investing in the fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the fund for the time periods indicated and then redeem all of your shares at the end of those periods, that your investment has a 5% return each year, and that the fund's operating expenses remain the same. The example also assumes that any current expense limitation arrangement remains in place for the period noted in the previous table; therefore, the figures have been adjusted to reflect fee waivers or expense reimbursements only in the periods for which the expense limitation arrangement is expected to continue. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
<b>Portfolio</b>	\$ 51	\$ 204	\$ 370	\$ 852
<b>Portfolio—II Class</b>	77	283	506	1,148

**Portfolio Turnover** The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the fund's shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the fund's performance. During the most recent fiscal year, the fund's portfolio turnover rate was 86.3% of the average value of its portfolio.

### Investments, Risks, and Performance

#### Principal Investment Strategies

Normally, the fund invests at least 80% of its net assets (including any borrowings for investment purposes) in bonds and 65% of its total assets in short- and intermediate-term bonds. There are no maturity limitations on individual securities purchased, but the fund's average effective maturity will not exceed five years.

At least 90% of the fund's assets will consist of investment-grade securities that, at the time of purchase, are rated in one of the four highest rating categories assigned by established credit rating agencies from at least one major credit rating agency or, if unrated, deemed by T. Rowe Price to be of comparable quality. The fund's holdings may include corporate and government bonds, asset- and mortgage-backed securities, and foreign securities. While most assets will typically be invested in bonds, the fund also uses interest rate futures as an efficient means of managing the fund's exposure to interest rate changes and to adjust the portfolio's duration.

Investment decisions generally reflect the portfolio manager's outlook for interest rates and the economy, as well as the prices, yields, and credit quality of various securities in which the fund may invest. For example, if interest rates are expected to fall, the fund may purchase longer-term securities (to the extent consistent with the fund's investment program) in an attempt to seek higher yields and/or capital appreciation. Conversely, if interest rates are expected to rise, the fund may seek securities with shorter maturities.

### **Principal Risks**

As with any fund, there is no guarantee that the fund will achieve its objective(s). The fund's share price fluctuates, which means you could lose money by investing in the fund. The principal risks of investing in this fund, which may be even greater in bad or uncertain market conditions, are summarized as follows:

**Fixed income markets** Economic and other market developments can adversely affect the fixed income securities markets. At times, participants in these markets may develop concerns about the ability of certain issuers of debt instruments to make timely principal and interest payments, or they may develop concerns about the ability of financial institutions that make markets in certain debt instruments to facilitate an orderly market. Those concerns could cause increased volatility and reduced liquidity in particular securities or in the overall fixed income markets and the related derivatives markets. A lack of liquidity or other adverse credit market conditions may hamper the fund's ability to sell the debt instruments in which it invests or to find and purchase suitable debt instruments.

**Market conditions** The value of the fund's investments may decrease, sometimes rapidly or unexpectedly, due to factors affecting an issuer held by the fund, particular industries, or the overall securities markets. A variety of factors can increase the volatility of the fund's holdings and markets generally, including political or regulatory developments, recessions, inflation, rapid interest rate changes, war, military conflict, or acts of terrorism, natural disasters, and outbreaks of infectious illnesses or other widespread public health issues such as the coronavirus pandemic and related governmental and public responses (including sanctions). Certain events may cause instability across global markets, including reduced liquidity and disruptions in trading markets, while some events may affect certain geographic regions, countries, sectors, and industries more significantly than others. Government intervention in markets may impact interest rates, market volatility, and security pricing. These adverse developments may cause broad declines in market value due to short-term market movements or for significantly longer periods during more prolonged market downturns.

**Interest rates** The prices of, and the income generated by, debt instruments held by the fund may be affected by changes in interest rates. A rise in interest rates typically causes the price of a fixed rate debt instrument to fall and its yield to rise. Conversely, a decline in interest rates typically causes the price of a fixed rate debt instrument to rise and the yield to fall. The prices and yields of inflation-linked bonds are directly impacted by the rate of inflation as well as changes in interest rates. Generally, funds with longer weighted average maturities and durations carry greater interest rate risk. Changes in monetary policy made by central banks and/or governments, such as the discontinuation and replacement of benchmark rates, are likely to affect the interest rates or yields of the securities in which the fund invests.

**Credit quality** An issuer of a debt instrument could suffer an adverse change in financial condition that results in a payment default (failure to make scheduled interest or principal payments), rating downgrade, or inability to meet a financial obligation. Securities that are rated below investment grade carry greater risk of default and should be considered speculative.

**Derivatives** The use of interest rate futures exposes the fund to additional volatility in comparison to investing directly in bonds and other debt instruments. These instruments can experience reduced liquidity and become difficult to value and may involve leverage so that small changes produce disproportionate losses for the fund. The fund's use of interest rate futures involves the risk that anticipated interest rate movements or evaluations of yield curves will not be accurately predicted, which could harm the fund's performance.

**Foreign investing** Investments in the securities of non-U.S. issuers may be adversely affected by local, political, social, and economic conditions overseas; greater volatility; reduced liquidity; or decreases in foreign currency values relative to the U.S. dollar. The risks of investing outside the U.S. are heightened for any investments in emerging markets, which are susceptible to greater volatility than investments in developed markets.

**Liquidity** The fund may not be able to meet requests to redeem shares issued by the fund without significant dilution of the remaining shareholders' interests in the fund. In addition, the fund may not be able to sell a holding in a timely manner at a desired price. Reduced liquidity in the bond markets can result from a number of events, such as limited trading activity, reductions in bond inventory, and rapid or unexpected changes in interest rates. Markets with lower overall liquidity could lead to greater price volatility and limit the fund's ability to sell a holding at a suitable price.

**Prepayments and extensions** The fund is subject to prepayment risks because the principal on mortgage-backed securities, asset-backed securities, or any debt instrument with an embedded call option may be prepaid at any time, which could reduce the security's yield and market value. The rate of prepayments tends to increase as interest rates fall, which could cause the average maturity of the portfolio to shorten. Extension risk may result from a rise in interest rates, which tends to make mortgage-backed securities, asset-backed securities, and other callable debt instruments more volatile.

**Active management** The fund's overall investment program and holdings selected by the fund's investment adviser may underperform the broad markets, relevant indices, or other funds with similar objectives and investment strategies.

**Cybersecurity breaches** The fund could be harmed by intentional cyberattacks and other cybersecurity breaches, including unauthorized access to the fund's assets, customer data and confidential shareholder information, or other proprietary information. In addition, a cybersecurity breach could cause one of the fund's service providers or financial intermediaries to suffer unauthorized data access, data corruption, or loss of operational functionality.

## Performance

The following performance information provides some indication of the risks of investing in the fund. The fund's performance information represents only past performance and is not necessarily an indication of future results.

The following bar chart illustrates how much returns can differ from year to year by showing calendar year returns and the best and worst calendar quarter returns during those years for the fund's Portfolio Class. Returns for other share classes vary since they have different expenses.

The following table shows the average annual total returns for each class of the fund that has been in operation for at least one full calendar year, and also compares the returns with the returns of a relevant broad-based market index, as well as with the returns of one or more comparative indexes that have investment characteristics similar to those of the fund, if applicable.

## Average Annual Total Returns

	Periods ended December 31, 2022			Inception date
	1 Year	5 Years	10 Years	
<b>Portfolio</b>	-4.52 %	1.11 %	0.91 %	<b>05/13/1994</b>
<b>Portfolio—II Class</b>	-4.78	0.86	0.66	<b>03/31/2005</b>
Bloomberg 1-3 Year U.S. Government/Credit Bond Index (reflects no deduction for fees, expenses, or taxes)	-3.69	0.92	0.88	
Lipper Variable Annuity Underlying Short Investment Grade Debt Fund Average	-5.77	0.84	1.04

### Purchase and Sale of Fund Shares

The fund is not sold directly to the general public but is instead offered as an underlying investment option for variable annuity or variable life insurance contracts. Although the fund does not require a minimum amount for initial or subsequent purchases from insurance companies, your insurance company may impose investment minimums for your purchases of the fund.

You may purchase, redeem, or exchange shares of the fund on any day the New York Stock Exchange is open for business. You must purchase, redeem, and exchange shares through your insurance company.

### Tax Information

The fund distributes any dividends and capital gains to its shareholders, which are the insurance company separate accounts that sponsor your variable annuity or variable life insurance contract. Variable product owners seeking to understand the tax consequences of their investment, including redemptions of fund shares and the impact of dividend and capital gains distributions by the fund, should consult with the insurance company that issued their variable product or refer to their variable annuity or variable life insurance contract prospectus.

### Payments to Insurance Companies, Broker-Dealers, and Other Financial Intermediaries

The fund is generally available only through variable annuity or variable life insurance contracts. The fund and/or its related companies may make payments to a sponsoring insurance company or other financial intermediary for the sale of fund shares and related services. These payments may create a conflict of interest by influencing the insurance company or other financial intermediary to recommend the fund over another investment option or by influencing an insurance company to include the fund as an underlying investment option in a variable contract. The prospectus (or other offering document) for your variable contract may contain additional information about these payments. Ask your insurance company or financial intermediary, or visit your insurance company's or financial intermediary's website, for more information.
